GeekBok.com™ Introduces the Revolutionary iDrive

iDrive, bring peace to the Apple vs. Android war. Revolutionary MFI Certified Lightning, USB and Micro-USB in one.

Springfield, MO | July 20, 2015

Flash Technologies, LLC™ announces the release of their new [iDrive](#), a revolutionary MFI certified lightning, micro-USB and 3.0 USB flash drive for both Apple and Android products. www.GeekBok.com, a fully owned subsidiary of Flash Technologies, LLC is always on the cutting edge of innovation, style and functionality.

"Many consumers today have multiple mobile devices today, for example, I have an iPad, iPhone (personal phone) and a Samsung Note 3 (work phone). I am constantly sharing data between them. I have to connect them to my PC, upload, download, or email files to myself. We have all experienced the difficulties of trying to share or transfer data, photos, music, videos or movies between all of our devices. The [iDrive](#) solves this war/battle between PC, Mac, Apple, and Android devices," stated Sherrie Householder, COO of Flash Technologies, LLC™. The iDrive at Geekbok.com solves this problem.

What makes the [iDrive](#) unique? It features:

- MFI certified lightning connector (iPhone 5, iPhone 5s/5c, iPhone 6 / iPhone 6 Plus, iPad 4th, iPad Air, iPad Air 2, iPad Mini, iPad Mini 2, iPad Mini 3, iPod Touch 5th, iOS 6 / iOS 7 / iOS 8)
- Standard 2.0 USB, for connecting with Mac/PC computers
- **Micro-USB to connect to most Android devices.**
- Easy operational app for trouble free file transfers, backups, and auto playing
- Speed up to 15 MBS
- 12 Month manufacturer's warranty
- Environmentally conscious, made from recycled aluminum

Geekbok designed the iDrive to allow easy transfer files, music, photos, contacts, videos, and movies between all OS devices. The iDrive also features an auto playback app so users have immediate access to their files and media while preventing lengthy synchronization or paying for streaming services. The iDrive can function as an ordinary USB flash drive on Mac or PC to browse and open documents, photos, music, and video files, and perform file management (Copy, Paste, Delete etc.) on both Mac/PC and iOS devices. The iDrive is safe and secure since no data is sent through 3rd party services or transferred through the Internet or Cloud where hackers and others (like server operators) may gain access. Keep your data safe, convenient, mobile with the iDrive by GeekBok.com, and get your "Geek on."

Flash Technologies LLC™ is a rapidly growing technology firm with headquarters in Springfield, MO, who actively pushes the limits of technological development. From the origin of the company, in late 2011, there has been a common goal of developing products that enhance the capabilities of society and push the limits of mobile technology. From its humble beginnings in a household garage, much like Microsoft, Apple, Amazon, Google, and many other fortune 500+ companies, Flash Technologies, LLC™ has grown to a 12,000 sq. ft. fulfillment center. Flash Technology, LLC™ has quickly becoming one of the nation's leading suppliers of mobile technology, wholesale cell phone repair parts, replacement cell phone screens, replacement iPad screens, replacement iPhone screens, and cell phone accessories in the United States. With an excellent track record for great customer satisfaction and quality products. Flash Technologies have never compromised our quality or the services that we provide. Flash Technologies core beliefs is keeping their customers happy by providing them with products at very competitive pricing.
