

**Connecting maintenance professionals to their operations  
in ways that revolutionize the way maintenance is performed**

**Make Your CMMS The Most Powerful Tool in Your Belt**

## A CMMS should simplify your maintenance process - not complicate it

*Maintenance management shouldn't be a challenge and neither should selecting a CMMS solution. Here are the Top 10 Reasons Maintenance Connection (MC) is the right choice:*

- ✔ **Scalability** - We offer a solution that's ideal for managers and technicians alike and allows for grow within any organization, from a single group setup to many maintenance departments.
- ✔ **Multi-Language Capability** - Our CMMS is ideal for organizations with international operations or multi-lingual maintenance staffs.
- ✔ **Multiple Deployment Options** - Our system can be purchased online as a cloud (SaaS) solution, on premise as a customer-hosted solution, or as a combination of both with our cloud hybrid option.
- ✔ **Ease-of-Use** - Our CMMS is built with a user friendly, intuitive interface that makes maintenance management simple.
- ✔ **Cost Effective** - Our solution is packaged at a price point for which is easy to budget and that has been proven to help clients realize significant savings over time by minimizing costly downtimes.
- ✔ **Data Security** - We use a highly reliable, multi-faceted security platform to ensure all data is protected. Additionally, field level security at the user level controls access to maintenance records, based on permissions granted by administrators.
- ✔ **Easy Integrations** - We offer a simple and highly secure web API that provides seamless integration to many third party systems
- ✔ **Expert Implementation** - Our experts use a proven approach that includes a six phase implementation process, resulting in a uniquely tailored approach for every new customer.
- ✔ **Regular Updates** - Our system is continually being upgraded with brand new features and heightened functionality, much of which is based upon user-driven feedback.

## Listening to Customer Needs Is Our #1 Priority That's Why Our Customer Support Satisfaction Rate is 98%

“The best part about Maintenance Connection is the support behind the product. If you need help, you will get near immediate response. If you want something changed about the software, they are willing to make changes. It is not just packaged up software that remains as is. There was no other software that we found that could do as much as Maintenance Connection does. I would definitely recommend this software before trying out any other software, because this far exceeds any other options available.”

- Heather M. Navistar, Inc.

# MAINTENANCE MANAGEMENT REDEFINED

Since 1999, Maintenance Connection has been bringing you Computerized Maintenance Software that's cost-effective and easy to use. Our CMMS has been proven successful in meeting the needs of all types of maintenance organizations. We have redefined the way a CMMS is used world-wide.

**“One Type Fits All” isn't realistic for your maintenance jobs, and it shouldn't be for your CMMS.**

Whether you have a multi-site organization or a small facility for which you have to maintain maintenance, we have the right solution for your business.

Using Maintenance Connection's simple, easy-to-use web-based application can help your organization increase asset life, track maintenance costs, prevent and predict asset failures, improve labor productivity, reduce costly downtimes, minimize investments in inventory, and lower the total cost of maintenance.

We help companies across a broad range of industries manage their maintenance. Here are just a few:

- ✓ Manufacturing
- ✓ Facility Management
- ✓ Healthcare
- ✓ Transportation
- ✓ City & State Departments
- ✓ Energy
- ✓ Government
- ✓ Recreation
- ✓ Schools & Universities
- ✓ Metal/Mining

**Work Order Tracking**
