Aerovox Corp. reports performance milestone for defibrillator capacitors

Over 1.25 million shipped with zero reported field failures

New Bedford, MA (July 23, 2015) - Aerovox Corp., a worldwide market leader in defibrillator film capacitors, has shipped over 1.25 million capacitors for external defibrillator applications with zero reported field failures. Aerovox's defibrillator capacitors are designed specifically to meet the reliability demands of a Class III medical device.

All Aerovox defibrillator capacitors are manufactured in its state-of-the-art facility in New Bedford, Massachusetts under an ISO 9001-certified quality management system. They are 100% tested prior to shipment, and test data is retained for five years for complete traceability. Each capacitor is identified with a unique barcoded serial number.

Aerovox continuously invests in R&D to keep pace with industry demands for smaller and lighter external defibrillators. Recently, low profile flat designs with a 30% increase in energy density and reduced charge time have been introduced. Additionally, Aerovox has improved humidity and moisture resistance characteristics for dry capacitors.

"Our capacitors are used by many industry-leading U.S. and international manufacturers," said Jim Faughnan, Aerovox President & CEO. "Our strong market share speaks to our product's long-term, proven reliability. Our technology roadmap will continue to drive product enhancements to support industry trends without sacrificing performance or life."

About Aerovox Corp.

Aerovox is a leading provider of film capacitors for industrial, medical, military/aerospace and specialized applications serving original equipment manufacturers (OEM) and distributors. The company has world-class design, manufacturing and testing facilities in New Bedford, Massachusetts and global manufacturing facilities in China and India to enable quick turn-around for shipping and delivery worldwide. Aerovox capacitors are among the world's most reliable electronic components. The company's extensive custom design and development capabilities coupled with its broad, standardized product offerings allow it to provide intelligent capacitor solutions that meet or exceed customers' application requirements. <http://www.aerovox.com>
