iPatientCare EHR Continues to Add More Providers who Switch to iPatientCare because of its ICD-10 Readiness

iPatientCare Announced Successful Migration to ICD-10 of Physicians' Offices Switching to iPatientCare and Continuing as iPatientCare Users

iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR, Integrated Practice Management and Patient Engagement Solutions announced its success with ICD-10 migration for existing and new users choosing to switch to iPatientCare from other EHR vendors.

Centers for Medicare and Medicaid Services (CMS) sees no further delays in nationwide transition to ICD-10 from ICD-9. ICD-10 will affect diagnosis and inpatient procedure coding for everyone covered by Health Insurance Portability Accountability Act (HIPAA), not just those who submit Medicare or Medicaid claims. The transition addresses the need for new and expanded codes which are not present in the outdated ICD-9 version.

With less than three months to go-live, some offices still lag behind the transition recommended by the Centers for Medicare and Medicaid Services (CMS) in its ICD-10 Timeline for Small-Medium Practices. Switching to an already "ICD-10 Ready" EHR is the most practical and fastest option available to such practices.

"We remain committed to our ICD-10 migration schedule, utilizing the dual-coding feature of iPatientCare until the official cut-off date and utilizing this period to transition over from ICD-9 to ICD-10. Our special Task Force has been guiding our customers through their practice implementation process and enabling their participation in testing cycles with insurance carriers, as they become ready. Our dual coding feature enables our clients to handle day-to-day activities in ICD-9, yet easily conduct carrier tests in ICD-10," said Udayan Mandavia, President/CEO, iPatientCare.

iPatientCare understands the needs of the providers in terms of the time constraints, and hence, has invested heavily in evolving smart software programs that studies the usage pattern of every single provider in a practice and helps them map existing clinical conditions to the most appropriate ICD-10 code for each patient.

"iPatientCare team is dedicated to make the ICD-9 to ICD-10 transition as seamless as possible and now I feel that I have a huge weight off my shoulders, and we will convert seamlessly by Oct, 1st 2015 in advance of the deadline. I Just gotta love iPatientCare team helping us "mark-off" one thing from our list of "IMPORTANT TO-DO," said Timothy Wakefield, DC, Diplomat in the American Chiropractic Board of Sports Physicians (DACBSP).

"iPatientCare's rich knowledge base includes the fact that GEMS cross-walk is not meant as the final authority to transition over from ICD-9 to ICD-10, and hence, allows for mapping those ICD-10 codes which have been recommended by CMS. This fact has been one of the critical criteria that iPatientCare has successfully fulfilled to win over providers using EHR other than iPatientCare," commented Kedar Mehta, CTO, iPatientCare.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at ONC Certified Health IT Product List.

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
