

- » Improve patient care, staff satisfaction & workflow through automatic call process reminders
- » Initiate customised alarms directly from the touch screen interface and manage evidence-based rounding
- » Duty Stations can connect anywhere on the LAN for added flexibility

IP Duty Station

The IP Duty Station is a sleek touch screen that provides a clear display of calls, reminders for rounding, wound care and pain assessment. Additionally, the Touch Duty Station may be used to initiate custom notifications for transport, cleaning or events your facility wishes to define.

A high-resolution back-lit LCD with a bright, high contrast display that is easy to read and simple to configure. Call type priorities are colour-coded, allowing highest priority calls to be easily identified.

In the hectic environment of the Med/Surg unit, caregivers must juggle countless requests throughout the day. Tacera provides your staff with the added confidence that they are providing patients with high quality care by initiating rounding, wound care and pain assessment via the IP Duty Station. Patient satisfaction is increased as they may be assured that all their needs are taken care of at scheduled intervals throughout the day.

A Nurse's Station in Every Room

The IP Duty Station is like having a Nurse's station in every room. Care providers can easily view a list of every active call, in every room, to gain a holistic view of the ward. The level of priority, location, type and duration of each call is displayed as text, and is accompanied by distinctive alert tones for each priority of call.

The IP Duty Station can in addition provide VoIP two-way speech communication, you must purchase the license IPC-DUTY/VoIP to enable this feature. This allows calls between the IP Duty Station and any speech point, or nurse station on the system to be easily initiated or answered. It also adds the ability to call out or receive

calls, short cut one button dialling and have a hands-free operation push to call.

IPC-DUTY/Workflow

By acquiring the IPC-DUTY/Workflow license with the IP Duty Station, a Healthcare facility really benefits from increased clinical workflow features, enabling nurses to manage their day to day tasks such as;

Rounding

The IP Duty Station assists caregivers in supporting the evidence-based practice of rounding by reminding them when it's time to check in on patients. Rounding provides more than boost patient satisfaction; it also;

- Reduces the number of patient falls.
- Improves the ward's workflow by reducing the number of calls and
- Increases interaction between caregivers and patients.

Pain Assessment

Good pain management is a key component in providing the overall quality of care for your patients. Since a patient's self-report is the single most reliable indicator of the existence and intensity of pain, ongoing communication is vital to managing pain and speeding recovery. Tacera helps caregivers establish and maintain the all-important element of trust with their patients by reminding them to perform invaluable hourly pain assessments.

Wound Care

A "Wound Care" button on the IP Duty Station prompts caregivers to check on patients' wounds so they can apply dressings, administer pain medication, and assist patients to move in bed to relieve pain and prevent bedsores. Wound care reminders can be

dispatched directly to your facility's Physical Therapy department or Wound Care group, according to the patient's needs and internal processes. By sending the calls directly to the appropriate wound care providers, nurses can stay focused on their rounding procedures, knowing that their patients are getting the care they need.

Technical Specifications

Feature	Description
Height	160mm
Width	220mm
Depth	50mm
Weight	390g
Housing	IDES C6200 UL94-V0 plastic
Mounting Method	Wall Clamp, Flush mount
Mounting Height	142mm cavity (inner)
Mounting Width	205mm cavity (inner)
Display Size	7"
Display Resolution	800 x 480 (16:9) Px
Power Input	PoE IEEE 802.3 af/at
Temperature	0-40°C
Humidity Range	20-90% relative humidity at 35°C

Compliance

Designed to comply with:

- AS 3811:1998 Hard-wired patient alarm systems for hospitals.
- AS 2999:1989 Alarm systems for the elderly and other persons at risk.
- HTM 08-03: Bedhead services.
- UL 1069 Hospital Signaling and Nurse Call Equipment.
- C-Tick Electromagnetic compatibility.
- IEC 60601-1, UL 60601-1 and CAN/CSA C22.2 No. 601.1-M90: Medical electrical equipment - Part 1: General requirements for safety.
- CE Mark of European Conformity.

Manufactured in general accordance with the requirements of international quality assurance standard ISO9002.
