

Denovo Supports Oracle's JD Edwards EnterpriseOne Internet of Things Solutions

Boulder, CO July 30, 2015 /PRNewswire/ -- In alignment with its long term investment in Oracle's JD Edwards innovation, Denovo, a Platinum level member of Oracle PartnerNetwork, is excited to announce expanded Internet of Things (IoT) offerings that will leverage new functionality released recently with Oracle's JD Edwards EnterpriseOne IoT Orchestrator. This new JD Edwards product can allow customers to collect, filter, analyze, and act on real-time data as it is being transmitted by IoT devices. Oracle's JD Edwards EnterpriseOne customers benefit by eliminating costly manual processes, by reacting to—or avoiding—business disruptions in real time, and by analyzing historical data for continuous process improvement. As a result of their participation in the JD Edwards EnterpriseOne IoT Orchestrator beta program, Denovo gained early insight into and knowledge of the JD Edwards EnterpriseOne IoT Orchestrator functionality and value.

"Oracle's JD Edwards EnterpriseOne Internet of Things Orchestrator can change our customers' businesses. Operations can run leaner, react faster, and make accurate business decisions with real-time data," said Robert Monahan, vice president product management, Oracle.

Denovo has demonstrated continued success in revolutionizing Oracle's JD Edwards EnterpriseOne. Denovo was among the first to offer JD Edwards in their private cloud and on Amazon's AWS public cloud. Seeking to expand capabilities of JD Edwards beyond the back-office, Denovo Labs and Oracle's JD Edwards Labs have collaborated to deliver innovative IoT and Wearable Solutions to JD Edwards's customers. With increasingly integrated IoT solutions, Denovo is able to expand its JD Edwards offerings and create a new generation of technology solutions for JD Edwards' customers.

Denovo's IoT solutions include partnerships with device manufacturers and software vendors that enable access to emerging capabilities. IoT solutions include asset tracking, maintenance program improvement, operational performance monitoring, retail management, and other solutions that apply across industries such as Agribusiness, Manufacturing, Distribution, Real Estate Management, and more. Denovo is paving the way for companies to identify IoT use cases, and design, implement and manage solutions including sensor networks, data gateways, real time event processing engines and ERP integrations. These new extensions present great opportunities in business efficiency and are increasing in usage and viability.

Mark Goedde President and COO at Denovo, stated, "As a stakeholder in testing this new offering, Denovo is excited to bring the benefit of our IoT knowledge to our eager customers. Oracle's JD Edwards EnterpriseOne IoT Orchestrator is designed to make it easier for enterprises to connect sensors and devices to JD Edwards applications. As a result, enterprises can gain new ways to increase revenues, reduce costs, and maintain regulatory compliance."

"Oracle's JD Edwards EnterpriseOne IoT Orchestrator is facilitating new possibilities in sensors, mobile devices and wearables for our JD Edwards customers. We are excited to be helping drive this innovation and look forward to its great benefits," said Marty Snella, CEO, Denovo.

About Denovo

Established in 2003, [Denovo Ventures](#), LLC is a full-service cloud computing and enterprise hosting professional services firm with extensive knowledge in designing, installing, managing and supporting enterprise software solutions in private, hybrid and public cloud platforms. Denovo delivers technology and managed solutions from their SOC 2 certified data centers located in the United States. As a Platinum level member of Oracle PartnerNetwork, Denovo's professional services team successfully completed many Oracle ERP projects for a wide variety of commercial and public sector clients. The company is headquartered in Niwot, Colorado in the Denver-Boulder technology corridor and serves a worldwide client base from its East, Central, and West regional offices.
