Boeing, IBM, Amazon, NASA to present at 2015 Nagios World Conference

The Nagios World Conference, the premier event for the IT infrastructure monitoring industry, provides real-world solutions to issues of system security, downtime, optimization and more.

ST. PAUL, MINN., July 31, 2015—Nagios Enterprises LLC, the industry standard in IT infrastructure monitoring, announces the lineup for its annual World Conference, including speakers from Amazon.com Inc., The Boeing Co., IBM Corp., NASA and more. The conference, with more than 25 technical sessions, two days of support workshops and networking opportunities with hundreds of IT professionals, runs Sept. 28-30 at the Crowne Plaza St. Paul Riverfront Hotel in beautiful downtown St. Paul, Minn.

Conference speakers will address issues poised to influence the IT industry in 2015 and beyond. Highlights include:

- A presentation from Boeing on how Nagios Core redefined support of the on-orbit fleet of Boeing satellites and changed the way mission operations are performed with the next generation of satellites
- Use cases from Amazon and how Nagios can enhance hardware applications with alerting and monitoring
- Best practices for Nagios XI ranging from flexible object configurations to back end performance enhancements

Conference attendees will receive free onsite training and Nagios certification as well as new product discounts. They'll also get a chance to play with the latest Nagios products at demo tables overseen by tech support employees. An evening event at the Landmark Center will provide opportunities to connect with the smartest IT professionals from around the world.

The Nagios World Conference is the premier event for Nagios practitioners and innovators to expand their knowledge of IT management solutions, collaborate with others and improve the productivity of their IT environments. More information about the conference is available at conference.nagios.com.
