iPatientCare Announces to showcase its Clinically-driven Revenue Cycle Management Value-Add at upcoming MGMA 2015 Annual Conference at Nashville

Visit iPatientCare Booth# 1514 at MGMA 2015 Annual Conference at Nashville, Oct. 11-14

Woodbridge, New Jersey, August 11, 2015 -- iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR, integrated Practice Management and Patient Engagement solutions, announced to showcase its Clinically-driven Revenue Cycle Management services at MGMA 2015 Annual Conference at Nashville, October 11-14, 2015.

Traditionally, Revenue Cycle Management (RCM) services have been offered by outsourced billing services ranging from 5% to 12% of monthly collections. These charges are in addition to many other costs already incurred by your office, such as, the servers (if hosted on premises) or hosting, EHR and PMS setup, training, support/subscription, and Clearing House fees.

iPatientCare, a national leader in offering Cloud-based integrated EHR and PMS software, has been transforming RCM services at 3.9% of your monthly collections. This one monthly price includes FREE Cloud-based Meaningful Use Stage-2 certified EHR and PMS technology. It also includes efficient, responsive and accountable billing implementation and back-office services that give more than 98% first-pass claims submission and efficient A/R follow-up/denial management.

Ramesh Reddy, MD has been one of the long-time customers of iPatientCare RCM. Commented Dr. Reddy, "We use iPatientCare RCM services. They are very reliable, the associates are knowledgeable, and they help address the day-to-day bill and receiving issues we all face in our practice. iPatientCare is very efficient, responsive and courteous. Their attention to detail is excellent. Our account receivables have remained manageable and their integrated software has helped us to keep track of money owed by payers and patients."

"Medical practices looking to switch their EHR love what iPatientCare had to offer. Significantly low rates, 3.9% of monthly collections, as a remarkable improvement in total billing infrastructure cost, reductions in A/R days, 360 degree view of practice financial performance using iPatientCare dashboards and reports, improved denial resolution and maximized cash flows, in addition to the excellent EHR and integrated products for free. I guess, the decision was very easy for the most.", said Hitesh Joshi, iPatientCare's RCM Process Lead.

As iPatientCare continues to grow robustly and organically based on its clear vision and growth strategies, providing value-added services of RCM/Billing and Quality Improvement Consulting are very timely and strategic. iPatientCare looks forward to discussing these solutions at Booth 1514 at MGMA 2015 Annual Conference, Nashville, October 11-14, 2015.

About iPatientCare

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at ONC Certified Health IT Product List.

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
