

PALOMAR CASE STUDY

MARTIN'S MILL ISD PORTABLE CLASSROOM

PROJECT SUMMARY

Title & Location

Martin's Mill ISD
Ben Wheeler, Texas

Type of Facility

Portable Classroom

Square Footage

1515 SF

Construction Timeline

5 Weeks

The Palomar Advanced Modular Advantage

- Design Services
- Engineering Services
- Estimating & Budgeting
- Pre-Construction
Coordination
- Project Management
- Material & Vendor Sourcing
- Manufacturing
- Transportation Services
- Installation &
Construction Services
- On-Site Supervision &
Coordination

Martin's Mill ISD in Ben Wheeler, Texas received expansion funding which allowed the district to add a 1515 square foot, double classroom building with restrooms to their campus. They chose to relocate their existing computer lab that had over grown its space in the school to the new environment designed to accommodate it. The second classroom will house a mini lab for their in school suspension (ISS) and credit recovery programs.

The administrators were able to repurpose a vacant tennis court on the school grounds to install the portable classrooms. The building was arranged with the entrance and windows facing north which wisely reduces heat gain from the Texas sun.
