

TrichoSystem™

Professional Hair and Scalp Diagnostic System

All in One Software Solution

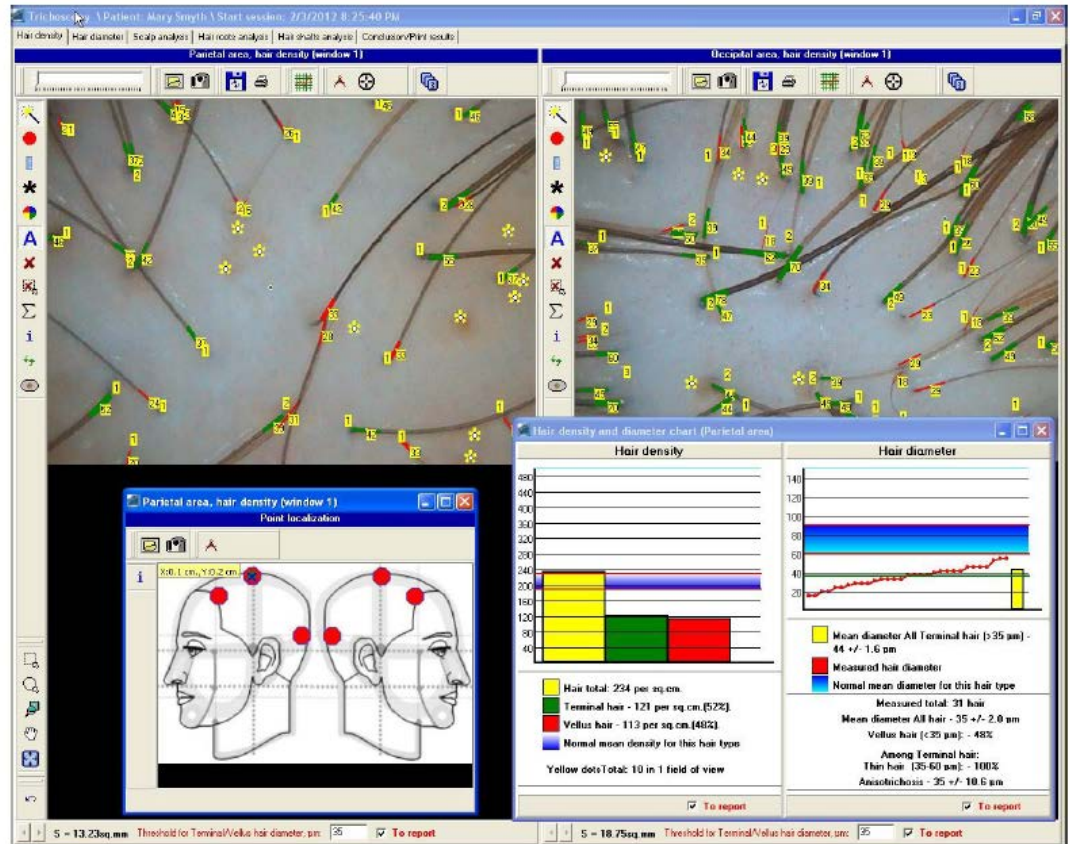

TrichoSystem includes the powerful TrichoSciencePro platform. This platform not only automatically performs hair and skin diagnosis, but it also has a suite of features for practice management. Now, the same software you use for patients can also be used to streamline your workflow.

Why TrichoSystem?

- Affordable
- Friendly User Interface
- Fast results and calculations
- Automatic summary conclusions
- All in one solution

Bundled with Firefly

The most advanced hair and scalp diagnostic system comes bundled with one of the most trusted names in Trichology equipment – Firefly. The DE330T TrichoScope from Firefly integrates with TrichoSciencePro to create the hardware and software bundle needed for accurate assessments and calculations – the TrichoSystem.

- Trichoscopy & Dermatoscopy applications
- Automated measurements & calculations
- Classic and Unit Trichogram studies
- Scalp Pigmentation Lesion assessments
- Includes TrichoSciencePro software and DE330T Firefly TrichoScope
- Practice Management Suite
- And much more!

- Advanced Skin and Hair Inc.
- Lexington International, LLC
- DS Laboratories

“Easy to use and very powerful. I highly recommend the TrichoSystem platform for anyone specializing in hair!”

– Dr. Mark DiStefano, DiStefano Hair Restoration Centers, Boston, MA

TrichoSystem incorporates the most up to date diagnostic and analytic Trichology software and a state of the art digital TrichoScope. Meeting increasing demands for a single software source, TrichoSystem performs and manages all clinical and non-clinical practice-associated activities. The program performs complete Trichoscopy, Phototrichogram, Trichogram, and Dermoscopy diagnostic studies. In addition, TrichoSystem offers modules to evaluate scalp pigmented lesions and global photograph studies, run fully automatic measurements and calculations, use specialty hair calculators, view previously held sessions, build analytic diagnostic session reports, manage patient sessions, outpatient cards, scheduling, databases and much more!
