

Dragonfly Press Release

Australia - Sydney Thursday Sept 3 2015

Cyber Security Strategic Partnership Aisa-Pacific

Today Dragonfly Technologies Pty Ltd (Dragonfly) are pleased to announce a strategic partnership with Singapore based NSHC (Singapore) Pte Ltd (NSHC).

The partnership will drive collaboration in the Asia-Pacific region between the two firms Dragonfly and NSHC.

“Our partnership with NSHC is a collaboration that will span several countries and includes Australia, Singapore, South Korea and Japan. Our partnership provides a single channel in the fight against cyber-crime for the local Australian market.” CEO Branko Ninkovic - Dragonfly.

The partnership will provide cyber security services in the areas of PCI DSS, Threat Intelligence, Penetration Testing and Application Security Services, Training and Awareness for Law Enforcement Agencies and Security Research.

“The key to fight cyber-crime across the Asia-Pacific region is through collaboration and NSHC is pleased to have formed the strategic partnership” CEO Louis Hur - NSHC

“Our collaboration with Dragonfly will bolster our research to be the leader in advanced offensive cyber warfare research. Our cyber capabilities in security intelligence from malicious attackers and our strategic partnership we will be leaders in the detection and response to new arising threats and zero-day and vulnerabilities. It is an important time and we must act accordingly to protect, detect and respond.” Jaekee Min, Vice-President, Global Business, NSHC

About Dragonfly

Dragonfly Technologies Pty Ltd was established in 2005 with the launch of fireflyMobile and has since grown to become a trusted name in information security and networking services to Australia’s top organisations and government agencies.

Dragonfly’s customers are medium-to-large organisations from a range of industries and sectors that include government, banking and finance, telecommunications, healthcare, retail and entertainment.

Over the years, the Dragonfly team has helped our customer's improve their security posture, reduce risk, and connect through leading edge and innovative technologies.
