

Your network is your greatest asset, are you treating it that way? EcoPATH can help simplify and optimize the network value cycle.

Whether you are looking to expand, launch a new network, or maintain compliance of an existing network our EcoPATH toolkit provides critical analytic and management capabilities to build and optimize network performance. As payers and providers work towards more collaborative and accountable models of engagement, it is critical that you understand your network cost, quality and clinical alignment drivers to ensure success.

Gain innovative insight into your network and achieve your clinical and financial network goals.

New Perspective | Valuable Insight | Meaningful Change

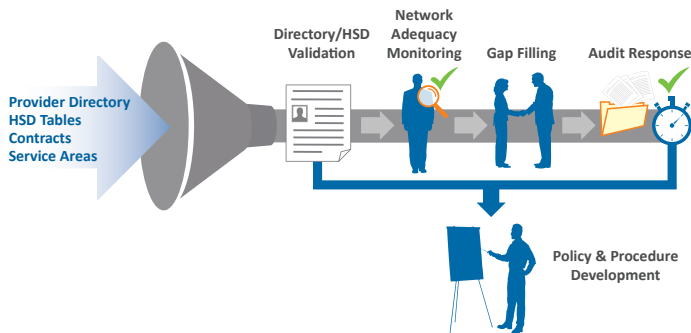

EcoPATH Product Suite

Let Glenridge HealthCare Solutions simplify your network maintenance process and optimize your network performance with the application of EcoPATH. Our solution empowers you to rapidly and continuously assess market opportunities, analyze and implement solutions, monitor adequacy, and meet all reporting requirements. The EcoPATH toolkit is comprised of four product offerings assuring network quality, marketability and profitability.

Monetize your Network Investment

Compliance Package Network Data Management

A comprehensive and proactive network monitoring program that identifies risk and offers solutions with timely responses to regulatory audits to avoid financial penalties and marketing sanctions.

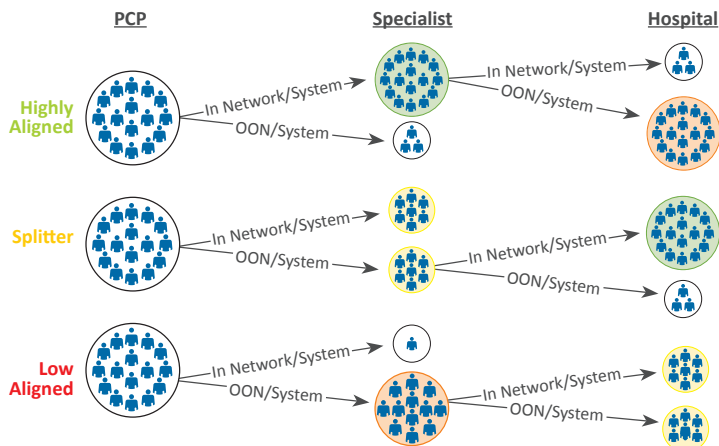

Approval Package CMS Application Execution

The simplified way to manage the multifaceted application filing process with strict requirements and compressed deadlines.

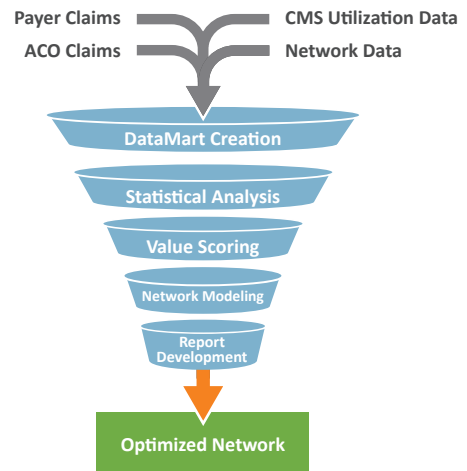

Alignment Package Referral Trend and Relationship Cohorts

A population focused approach that identifies patterns of care and leverages provider relationships to improve network performance, increase provider engagement and identify value-based contracting opportunities.

Performance Package Provider Care Quantification Profile

Analytic profiling tool used to assess individual provider efficiency and quality for network optimization modeling.

No matter where you are in your network life cycle, an EcoPATH subscription to one or all packages combined with our various levels of bundled value-add consulting services is the answer.

About Glenridge

Glenridge HealthCare Solutions is a nationally-recognized expert in provider network development. Collaboratively with clients, we build high performing networks that achieve competitive advantage. Our professional staff, utilizing sophisticated analytics and data management tools, establishes a positive and professional relationship with provider prospects, optimizes each contact, and moves the provider to agreement as quickly as possible. We service payers from large national organizations to local health plans.
