## Dave Arguin joins Helix Linear Technologies as Vice President of Business Development.

Beachwood, OH – August 27, 2015 – Helix Linear Technologies has hired Dave Arguin to help expand a steadily growing list of national and international lead screw and linear actuator clients.

After spending 15 years with Kerk Motion Products and then 7 years with Haydon Kerk – Ametek, Dave has established himself as a knowledgeable and innovative leader in the linear motion industry. On his new endeavors, Dave commented “I am happy to join Helix Linear and be part of such a great organization where I can utilize many years of experience and working relationships in the motion control industry to help grow the business. Helix Linear has established a solid foundation of people, products, and capabilities. We have some unique ideas and processes and I’m excited about taking our business to the next level.”

Chris Nook the President and CEO of Helix was excited about the recent hire - “Dave is a very talented professional with over 22 years of experience manufacturing lead screws and linear actuators. His focus is to work with our customers to provide precision linear motion solutions. We are very happy to have him on the Helix team.”

Helix Linear Technologies is a market leader in design, engineering, and manufacturing of precision linear motion and power transmission systems and components. Helix stands by its mission to be an innovative and responsive organization that manufactures linear motion products that meet or exceed their customers' specifications and expectations. More information on the company's extensive product lines, services provided, and industry leading innovation can be found here: [helixlinear.com](http://helixlinear.com)
