A NATIONAL DIALOGUE
ON ANTIMICROBIAL STEWARDSHIP

Antibiotic overuse and misuse have led to what's considered the healthcare crisis of this generation: *antibiotic resistance*. ABX CROSSROADS was established to build awareness and support strategic initiatives to address this critical problem.

**"A post-antibiotic era
— in which common
infections and minor injuries
can kill — far from being
an apocalyptic fantasy,
is instead a very real
possibility for the
twenty-first century."**

Keiji Fukuda, M.D.
World Health Organization

Complimentary Registration - Limited Seats Available

www.abxcrossroads.com

Presenters include internationally and nationally recognized experts in the field of antimicrobial stewardship.

Presentations will focus on monitoring the clinical metrics and economics of antimicrobial stewardship programs and best practices in acute and post-acute care settings regarding the use of antibiotics.

James Michael Keegan, M.D.

Principal, Pershing Yoakley & Associates
