- Authorize and Capture or Authorize Only Modes
- Support for 3DS and Non-3DS Modes in One Extension
- Credit Cards Can Be Processed by Customers and in Admin Orders
- Switch Between Test Mode and Live Production Mode in One Click
- Ability to Choose Post-Transaction Order Status
- Refunds
- Multi-currency Transactions
- AVS and Tokenization Support
- Simple Licensing and Support for Development Sites
- Fully Secure and PCI-Compliant

In November, Meticulosity will add support for re-occurring/subscription payments and Kount fraud detection support at no additional charge.

“Until today, FAC merchants were limited in their options for accepting payments on Magento. Our feature-rich extension offers nearly all of FAC’s features in one package – and we plan on fully supporting and enhancing the extension as FAC continues to expand functionality,” said David Ward, President of Meticulosity.

“Our location and client base within the Cayman Enterprise City Special Economic Zone puts us in a great position to work directly with FAC’s Caribbean client base,” he continued.

Tricia Lines Hill, FAC’s SVP of Business Development & Marketing said: “We are thrilled to be working with Meticulosity to bring our customers a fully supported extension for the most popular platform on the market. Meticulosity created the extension to support our various offerings, which will save our merchants lots of development work in customizing their integration to our gateway.”
