

The singing,
floating eggtimer.

BeepEgg[®]

It looks like an egg,
feels like an egg,
boils like an egg,
but it sings: BeepEgg[®]

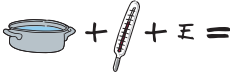

MADE IN GERMANY
PATENTED PRODUCT

BRAIN STREAM

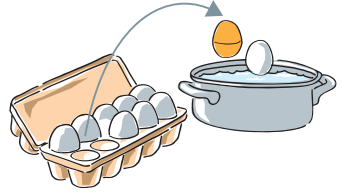

What you always wanted to know about BeepEgg®.

$$M\Theta^2(Ei^{\epsilon})$$

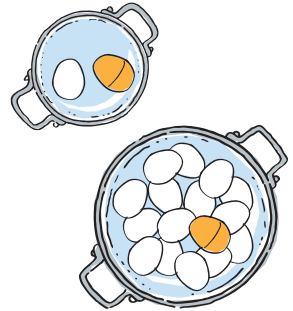

How does BeepEgg® work?

You store BeepEgg® together with the real eggs and also boil them together. BeepEgg® constantly measures the outer temperature, while storing as well as while boiling. With this data it calculates the core temperature of the egg, and BeepEgg® knows which temperature is which stage. Once the egg has reached the desired stage, it will play a melody.

Does BeepEgg® work everywhere?

Yes, due to its thermo model, it works at all altitudes and under all conditions. You can use it during diving excursions as well as on the Himalaya if you want to. Boil one egg or twenty at a time, start with cold or boiling water. It doesn't matter. BeepEgg® is always on point.

How to meet my personal taste on point?

Every edition plays three melodies, each being a signal for one level of hardness. These three different tunes will each be repeated several times to meet the egg sizes as well as to provide personal fine tuning possibilities.
