

SHINE A LIGHT ON YOUR CYBER RISK FROM THE DARK WEB AND BEYOND

Many of your company's most valuable assets are at risk to criminal activities carried out on the Dark Web - and you don't even know it. Turning a blind eye to this will impact your:

- Brand and reputation
- Customer loyalty
- Intellectual Property
- Legal defenses
- Sales
- IT baselines
- Cybersecurity strategy
- And much more!

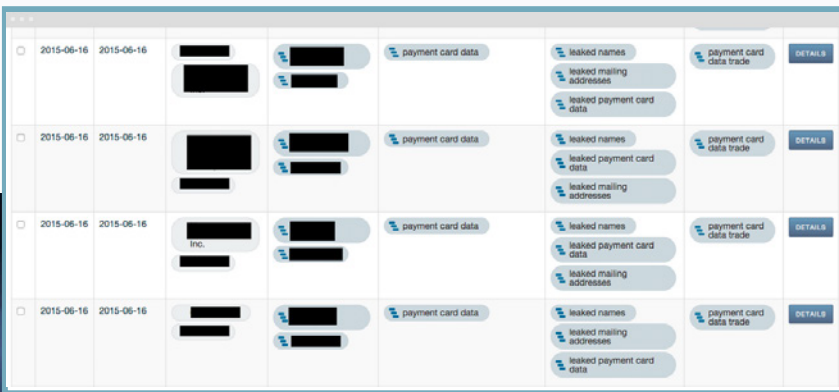

SurfWatch Labs removes this cybersecurity blind spot by providing you with personalized cyber threat intelligence from Dark Web and related sources.

SURFWATCH CYBER ADVISOR WITH DARK WEB

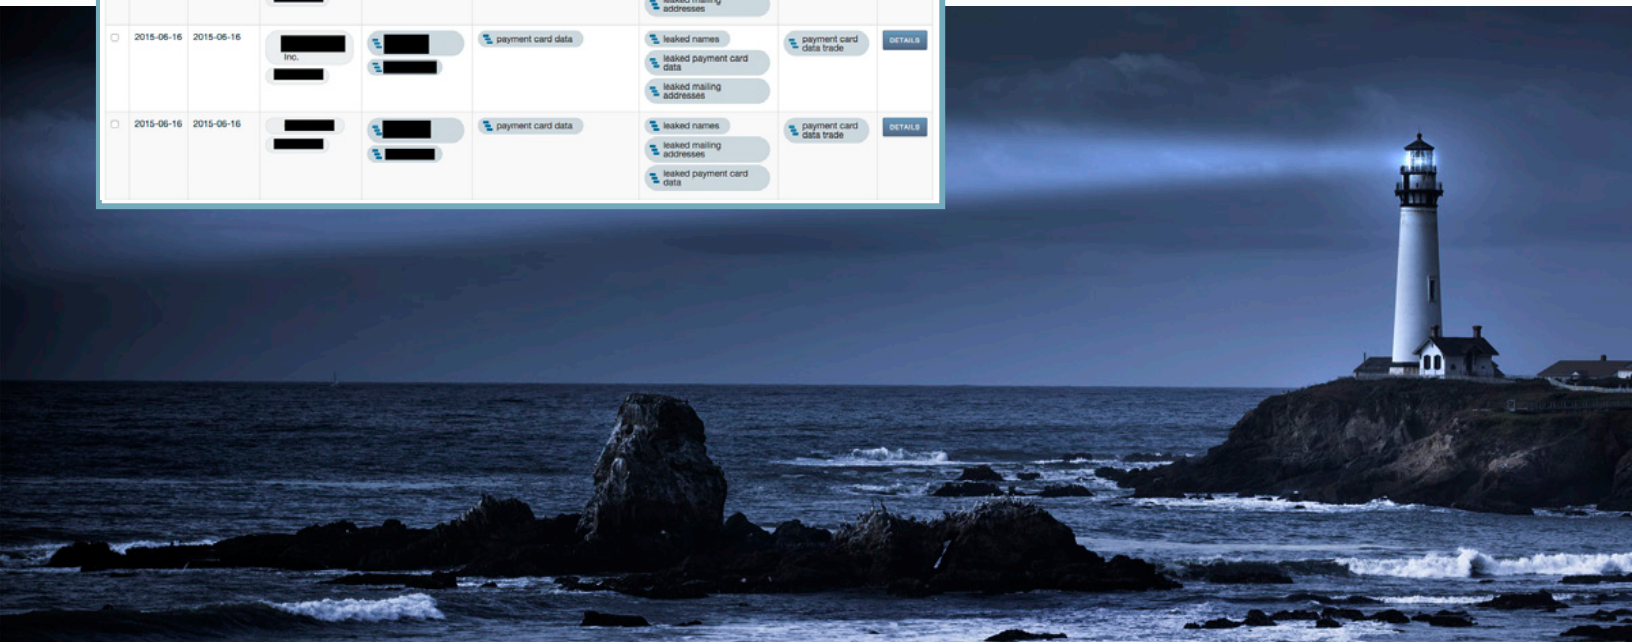

SurfWatch Cyber Advisor with Dark Web provides you a complete, out-of-the-box cyber intelligence solution that includes an initial risk assessment, continuous monitoring and risk mitigation recommendations for both traditional and Dark Web threats. Leverage a team of analysts with cyber intelligence and Dark Webs Ops expertise to establish a personalized cyber threat dossier, which is used as the basis to conduct in-depth, laser-focused Dark Web research, data collection and analysis and threat mitigation recommendations specific to your business.

FIND OUT IF YOUR BUSINESS IS AT RISK FROM:

- **General and Specific Cyber Exploits for Sale**—Malware aimed at particular tech targets, businesses or industries
- **Vulnerabilities for Sale**—Examples include hacked accounts, back-doors and many more
- **Stolen Intellectual Property, Designs and Counterfeits**—From stolen electronics designs to shoes to fake pharmaceuticals
- **Stolen Financial Information**—Includes theft of credit cards and bank accounts
- **Stolen Personally Identifiable Information (PII)**—Examples include medical records, social security numbers, identity theft and more
- **Targeted Spam and Phishing Campaigns**—Twitter targeting, malvertising and more

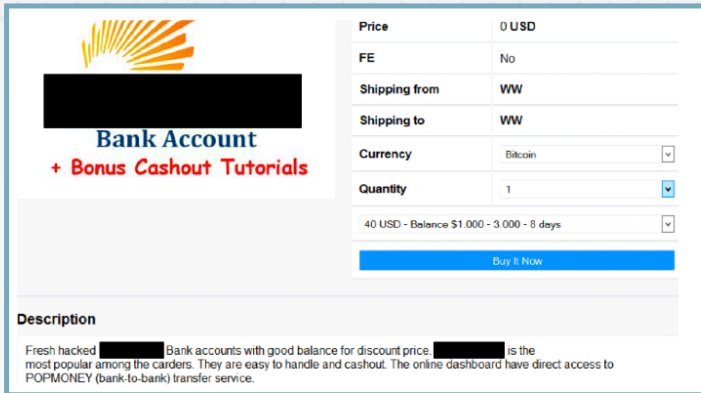

Date	Redacted Info	Threat Category	Details
2015-06-16	[Redacted]	payment card data	leaked names, leaked mailing addresses, leaked payment card data, payment card data trade
2015-06-16	[Redacted]	payment card data	leaked names, leaked payment card data, leaked mailing addresses, payment card data trade
2015-06-16	[Redacted]	payment card data	leaked names, leaked payment card data, leaked mailing addresses, payment card data trade

ELIMINATE YOUR CYBERSECURITY BLIND SPOT

In addition to our team of analysts and dedicated Dark Web Ops resources uncovering your cyber risks from the underground markets, SurfWatch Cyber Advisor with Dark Web also includes licenses to the SurfWatch Threat Intelligence Suite—giving you a complete picture of your relevant cyber threats and their potential impact on your business.

The screenshot shows a listing for a 'Bank Account' with a price of 0 USD. The listing includes details such as 'FE: No', 'Shipping from: WW', 'Shipping to: WW', 'Currency: Bitcoin', and 'Quantity: 1'. A 'Buy it Now' button is visible. The description mentions 'Fresh hacked Bank accounts with good balance for discount price' and 'POPmoney (bank-to-bank) transfer service'.

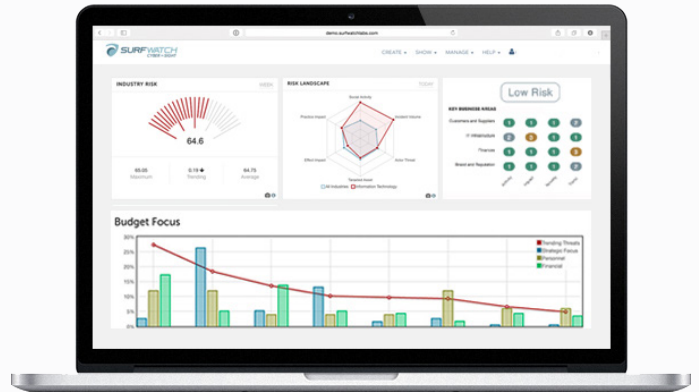

The screenshot shows a listing for 'SKIMMERS' with a price of 2050 USD. The listing includes details such as 'Seller: plastica', 'FE: No', 'Shipping from: US', 'Shipping to: WW', 'Currency: Bitcoin', and 'Quantity: 1'. A 'Buy it Now' button is visible. The description mentions 'USA Supply', 'Plastica', '2/19/15', 'Evo', 'Net SELF SERVICE', and 'A.I.U'.

Examples of the types of information collected by the SurfWatch Cyber Advisor with Dark Web solution that is standardized into the CyberFact information model for further analysis.

SURFWATCH THREAT INTELLIGENCE SUITE

The SurfWatch Suite is a set of integrated SaaS-based products, built on top of powerful cyber threat data and analytics, that can easily be tailored to improve cybersecurity understanding and collaboration across all of your core business functions. With the SurfWatch Threat Intelligence Suite you can gain visibility of the most relevant threats from outside your company walls and compare to what you're seeing in your SOC and supply chain. Now you have the information you need to quickly set the proper cybersecurity strategy to ensure a more resilient enterprise.
