

## THE CHATA CUSTOM-ENGINEERED DELIVERY SYSTEM

# THE CHEM+POUR® SPOUT BAG IN 1L, 3L AND 4L OPTIONS

Chata's CHEM+POUR® products are the next evolution of the bottle. Designed to provide a more environmentally friendly alternative to a bottle, combined with features to maintain proper aseptic technique while providing a smoother, more controlled pour.

The bag is multi-layered to be puncture-resistant and to maintain a sterile barrier for your solutions. The bags are sterilized using a validated and controlled dose of gamma irradiation and then filled in our ISO-certified cleanrooms with sterile-filtered solutions make this the ideal container for your solutions.

Chata's bags are filled under cGMP manufacturing requirements with batch records maintained for each lot in our class 10,000 (ISO-7) cleanroom, inside of an ISO-5 Biological Safety Cabinet (BSC). Solutions are manufactured using our validated water system that meets USP Purified Water and ASTM Type-1A specifications and with fully traceable ACS grade chemicals and HPLC grade solvents, unless otherwise specified. Solutions are made to each clients' exact specifications as listed on a mutually agreed product definition. All of this performed under Chata's unrivaled quality system.

CHATA'S SOLUTIONS ARE  
CONSISTENT, RELIABLE, AND  
EASY TO USE
