CENTER FOR VEIN RESTORATION CONTINUES SPROUTING IN THE GARDEN STATE

Announces 42nd Location Opening in Hamilton, Nj.

GREENBELT, Md. – Oct. 20, 2015 Center for Vein Restoration (CVR), the nation’s largest physician-led vein treatment medical practice, is proud to announce its expansion to Hamilton, Nj. This newest seed planted in the Garden State is slated to open on Nov. 2, 2015 and will be located at 1255 Whitehorse Mercerville Rd., Bldg. B, Ste. 507 Hamilton, NJ, 08619.

CVR proudly welcomes Dr. R. Lance Dillon as practicing physician at this new location.

“Venous insufficiency is a relatively prevalent disease yet it does not have the public awareness that it deserves.” Dr. Dillon states, “I enjoy helping patients recognize and understand their condition and then witnessing the dramatic results that can occur during and after treatment.”

This is an exciting time for CVR as they continue to grow as a leader in vein treatment. The Hamilton, Nj. location marks the 15th opening in 2015 for the blossoming medical practice.

ABOUT R. LANCE DILLON, MD, MBA

Board certified by the National Board of Medical Examiners and The American Board of Radiology, Dr. Dillon has pursued a rewarding career as an Interventional Radiologist and Women’s Imager, providing him with unique insights into the compassionate diagnosis, treatment and management of venous diseases. The skills that he acquired using ultrasound for diagnosis and procedural guidance are perfectly suited to the practice of Phlebology.

Dr. Dillon has also achieved the following:

- Member of the American College of Phlebology, American College of Radiology, American Medical Association, Beta Gamma Sigma Honor Society, Medical Society of New Jersey and the Radiologic Society of North America.

- While serving as director of his department at Ocean Medical Center in Brick, New Jersey, Dr. Dillon was recognized by the American College of Radiology as a Center of Excellence (2011) and was also elected twice as Physician of the Year (2013, 2008).
- Studied biology and was one of the first to graduate with honors in a combined degree of Biopsychology.

ABOUT VENOUS INSUFFICIENCY

Venous insufficiency, the cause of varicose veins and spider veins, indiscriminately affects more than 30 million Americans. Several factors like age, pregnancy, lack of motion, weight, genetics and a history of DVT can increase a person's risk of developing this all-to-common disorder. Treatment options include: making lifestyle changes like exercising more and avoiding standing or sitting for long periods of time, wearing compression stockings for better circulation in the legs and minimally-invasive procedures that either restore or extract the trouble veins.

ABOUT CENTER FOR VEIN RESTORATION

Having performed its first procedure in 2007 under President and CEO Dr. Sanjiv Lakhnarpal, Center for Vein Restoration (CVR) has since become the nationally recognized leader in the treatment of varicose and spider veins. Dedicated to relieving leg pain, treating the vascular cause of severe leg wounds, and eliminating unsightly veins, CVR's minimally-invasive procedures allow patients to look better, feel better, and live better. With 42 locations and growing, they have assembled the most qualified and experienced team of physicians, researchers, and staff to serve patients across Maryland, Virginia, Connecticut, Michigan, New Jersey, New York, Pennsylvania, and Washington, DC.
