

Denovo Cloud DR™

Unified Recovery Management in Private or Public Cloud Infrastructure

Unlike traditional tape restore solutions, Denovo Cloud DR™ uses real-time replication technology to transfer your data to our Cloud DR™ infrastructure. You can feel confident your revenue and business investments are protected with Denovo Cloud DR™. We build a DR Solution to meet **your** specific Recovery Point Objectives and provide ongoing monitoring, testing and validation of your infrastructure and data to ensure it is consistently replicated and usable.

Denovo's Cloud DR™ Private Cloud Map

Denovo offers a cloud agnostic approach. Our Cloud DR solution provides high security to ensure low risk.

In the event of a disaster, Denovo quickly launches the necessary resources in Amazon Web Services (AWS) to ensure business continuity. Denovo Cloud DR™ is available in all AWS regions around the globe. Denovo's Disaster Recovery Specialists will work with you to understand your business requirements and select the most appropriate location(s) for your DR infrastructure.

The Amazon Web Services Public Cloud Map

The Amazon Web Services Public Cloud offers a wide selection of geographic regions as well as increased economies of scale.
