Denovo Offers Managed Disaster Recovery in the Amazon Web Services (AWS) Public Cloud

Denovo's new enterprise class Managed Disaster Recovery Solutions offer improved RTO/RPO, faster time to recoverability, top tier security and a cloud agnostic approach.

Boulder, CO. October 28, 2015 /PRNewswire/ -- Denovo, a leading provider of enterprise cloud hosting, consulting, outsourcing and managed services, today announced new Managed Disaster Recovery Solutions. These new Managed Cloud DR solutions protect business data with security in mind, and with a new cloud agnostic approach, data is protected down to the application layer.

Unlike traditional tape based solutions, Denovo Cloud DR™ uses real-time replication technology to transfer data to their Cloud DR™ infrastructure. In the event of a disaster, Denovo quickly launches the necessary resources in Amazon Web Services (AWS) to ensure business continuity. Denovo Cloud DR™ is available in all AWS regions around the globe.

Denovo's dedicated disaster recovery specialists deliver the assurance that the ERP systems are being recovered by experts who understand their application and the critical business needs they serve. Denovo manages the complete restoration process to ensure repeatable recovery results.

Richard Dolewski, Chief Technology Officer, stated, "We have developed a portfolio of technologies that allow Denovo to recover data up to the minute by redefining Cloud. This answers today's business needs for diversity and data protection. We have eliminated the geographic risk associated with a regional disaster by accessing ERP applications and data through the cloud delivering increased resiliency and security."

An early innovator of cloud solutions, Denovo's Cloud offers customers a choice of private, public or hybrid cloud. Their global network of data centers offers real-world reliability for mission-critical applications. Denovo will utilize their QuickStart™ Platform to optimize and quickly standup disaster recovery solutions that get data recoverable in a fraction of the time. This proprietary technology uses industry best practices while bypassing hundreds of hours of technical work in a one click - immediate deployment.

"We are entering into a new era of disaster recovery services, Denovo now provides your choice of tiered Managed Disaster Recovery (MDR™) Services options. Our MDR™ Services are leading the industry for disaster recovery by providing our customers with cost effective DR alternatives and a greater sense of data safety & security," said Mark Goedde, Denovo's President and COO.

Marty Snella, Denovo's Chief Executive Officer stated, "Our strategies provide turn-key technologies that extend business solutions and protect company data from unforeseen disasters. Denovo's new solutions will also provide full business recovery in the time our customers' desire."

About Denovo
