FirePOWER with Advanced FireSIGHT Administration

Overview

Want to learn about the newest and hottest Security product from Cisco? Can't afford to take time off work? Attend our ASA with FirePOWER session Online during your lunch hour and learn about Cisco's #1 Security announcement of the year!

Cisco ASA with the Sourcefire sensor brings the most trusted network security IPS together with the most trusted network firewall. It provides multiple layers of protection across the entire attack continuum. Its advanced malware capabilities safeguard against both known and unknown threats. But what really sets it apart from the competition is that it offers unprecedented network visibility through FireSIGHT, so you can capture and see far more information in your network environment.

Todd Lammle, Cisco's Certification expert for over 25 years, renowned author and SourceFire expert, will be presenting this seminar so you don't miss this opportunity! He will be discussing what Sourcefire is and demonstrate with hands-on labs the incredible capabilities of Cisco latest acquisition.
