TeleWellnessMD Expands Services and Enhances User Experience for Online Wellness Healthcare Platform

The first provider of telehealth solutions for preventative medicine and wellness healthcare.

Clearwater, FL, October 29—[TeleWellnessMD](#), a wellness based telehealth service provider that offers program recommendations, products and services nation-wide through an online network of wellness healthcare providers, is expanding their services and enhancing the user experience on their online platform [TeleWellnessMD.com](#).

“TeleWellnessMD is the first wellness based telemedicine platform. Our vision is to expand the affordability and convenience of telemedicine by adding telehealth solutions for preventative medicine and wellness healthcare,” said TeleWellnessMD Founder and CEO, Brent Agin, MD.

Clients nationwide can request a wellness consultation with a TeleWellnessMD provider and conveniently obtain an e-prescription, when appropriate, without physically visiting a doctor’s office.

TeleWellnessMD’s improved online platform facilitates convenient prescription refills and improved client communication with wellness healthcare providers.

“As more consumers have adopted telemedicine as a healthcare option and e-healthcare becomes more widespread, we are growing our physician network, expanding our product and service offerings and elevating standards of client service.”

TeleWellnessMD now offers basic and comprehensive lab panels and will soon provide options for methylenetetrahydrofolate reductase (MTHFR) testing, micronutrient testing as well as new wellness products and packages including fibromyalgia treatment protocols.

Since its launch in 2014, TeleWellnessMD has been providing personalized wellness plans for weight management, disease prevention and anti-aging to assist clients with managing vitamin and nutrient deficiencies, hormone imbalance, immune support, athletic performance improvement, antioxidant support, inflammation reduction, improved sleep quality, energy improvement through metabolic enhancement and general wellness support for most medical conditions.

All TeleWellnessMD clients must be at least 18-years-old and maintain an established relationship with a primary care physician with routine checkups. TeleWellnessMD does not provide primary care medical services.

Clients may be prescribed various compounded pharmaceutical therapies as part of their wellness plan. TelewellnessMD offers access to premium doctor formulated oral nutraceuticals, dietary supplements and prescribed wellness therapies through a strategic partnership with Trim® Nutrition, Inc. and Empower Pharmacy, a premium compounding pharmacy, certified and licensed in states nation-wide.

Wellness programs are individualized based on client-specific needs and may include laboratory testing. TeleWellnessMD works with LabCorp and Spectracell to provide testing and lab services as needed. LabCorp has over 2,000 locations nationwide. LabCorp provides leading-edge medical laboratory tests and services through a national network of primary clinical laboratories and specialized Centers of Excellence.

About TeleWellnessMD

TelewellnessMD provides client care for age management, general nutrition and weight management needs through an online platform and network of wellness medical providers. All TeleWellnessMD clients maintain an established relationship with a primary care physician including routine checkups. TeleWellnessMD does not provide primary care medical services or prescribe any scheduled drugs. For more information visit [TeleWellnessMD.com](https://www.TeleWellnessMD.com).
