

T100 – Turnaround Management Using Primavera P6

OVERVIEW

For 80% of planners and schedulers, generic Primavera P6 training is enough; however, Turnaround Management is deep in the other 20%. This course provides hands-on training to allow one to take best advantage of the tools we offer for turnarounds, shutdowns, and outages. This class builds on the generic training and provides practical tips, tricks, and examples. We show processes to use the software to its maximum capacity that have been proven over many Turnarounds with numerous clients. Our trainers have worked the Turnarounds and will give real life examples. We know what works and what doesn't. In many cases, we are applying out-of-the-box approaches to systems to make them perform to their highest ability, and this course can help you do the same.

COURSE LEVEL:

Advanced

PREREQUISITE:

Primavera P6 Basic Training

PROFESSIONAL DEVELOPMENT:

Earn 13 PDUs

TARGETED ROLES:

Turnaround Managers
Turnaround Administrators
Planners/Schedulers
