

# RaMP Power

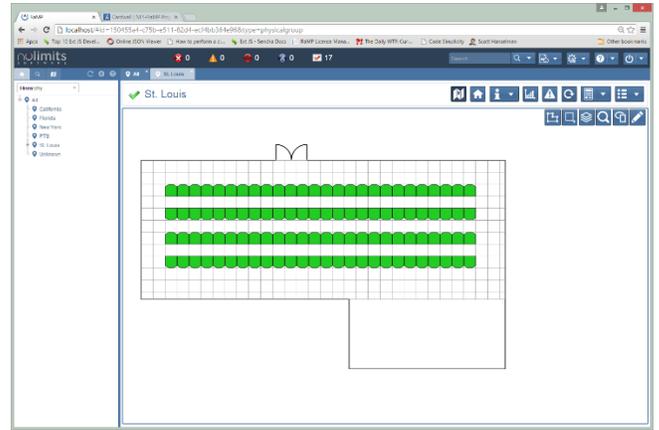

No Limits Software offers the quickest, easiest, and least expensive ways to get started with DCIM

While many data center managers can benefit from RaMP's full feature set – including server discovery and monitoring, tasks and workflow, asset management, automated network end to end connectivity, and monitoring via Modbus and BACnet – others simply want to manage power in the data center. **RaMP Power** gives you the features you need at a price you can afford.

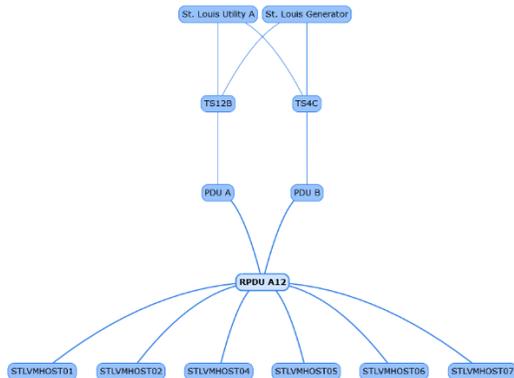

**RaMP Power** discovers and manages all SNMP power equipment including rack PDUs, PDUs, and UPSs, as well as environmental monitors. Lay out your data center with the easy to use editor and track power and temperature by cabinet. If you want to add servers, network, and storage equipment to populate the racks, you can purchase **RaMP Asset** to expand your capabilities

Location	Name	Type	Row	Column	Total Power	Power Capacity	Power Available	Design Available Power
<b>Accounting</b>								
Sample Location	Rack A-1	Rack	A	1	1.5 kW	3.5 kW	2.7 kW	2.3 kW
Sample Location	Rack A-2	Rack	A	2	1.7 kW	3.9 kW	3.1 kW	2.6 kW
Sample Location	SAN A	Network Storage	A	4	7.1 kW			
Sample Location	Rack B-2	Rack	B	2	2.2 kW	5.1 kW	4.0 kW	3.3 kW
Sample Location	Rack C-3	Rack	C	3	3.5 kW	8.0 kW	6.3 kW	5.3 kW
Total					16.0 kW			
<b>Development</b>								
Sample Location	Rack B-3	Rack	B	3	2.4 kW	5.5 kW	4.3 kW	3.6 kW
Sample Location	SAN B	Network Storage	B	4	7.1 kW			
Sample Location	Rack C-2	Rack	C	2	3.4 kW	7.8 kW	6.1 kW	5.1 kW
Total					12.9 kW			
<b>Human Resources</b>								
Sample Location	Rack A-3	Rack	A	3	1.9 kW	4.4 kW	3.4 kW	2.9 kW
Sample Location	Rack B-1	Rack	B	1	2.0 kW	4.6 kW	3.6 kW	3.0 kW
Sample Location	Rack C-1	Rack	C	1	3.3 kW	7.6 kW	5.9 kW	5.0 kW
Total					7.2 kW

## RaMP Power benefits

- Application allows setup in minutes; purchase the optional installation package and we'll do all of the setup work for you
- Simple license model allows you to buy in blocks of 25 devices; license includes the first year of support at no additional cost
- Track power usage and available capacity based on row, room, or other user-defined parameters such as department
- Visual view of the power chain allows you to quickly see potential points of failure
- Alerts let you know quickly when power or environmental problems occur
- Add more devices or move to the full RaMP version by simply upgrading your license
