

Rigaku to present latest X-ray analytical instrumentation at 2015 MRS Fall Exhibit

Rigaku Corporation
9009 New Trails Drive
The Woodlands
Texas 77381 USA

Rigaku will showcase its XRD, XRF and Raman technology at the 2015 MRS Fall Meeting & Exhibit in Boston

November 24, 2015 – The Woodlands, TX. [Rigaku Corporation](#) will be presenting its diverse lines of X-ray diffraction (XRD), X-ray fluorescence (XRF) and Raman spectroscopy instrumentation at the [2015 MRS Fall Meeting & Exhibit](#), Sunday, November 29, 2015 through Friday, December 4, 2015. The event is organized by the [Materials Research Society](#) and will be held at the Hynes Convention Center in Boston, Massachusetts. Rigaku, a global leader in X-ray analytical instrumentation, will be exhibiting at the event at *booth #712*.

The conference is the leading event for those in the field of materials research, and will showcase a wide range of product and service categories such as thermal processing equipment; electronic and electrical properties instruments; deposition equipment, processes and materials; materials characterization equipment; optical components and equipment and microscopes, including electron microscopy.

Materials analysis instruments from Rigaku range from benchtop devices, suited for researchers employing X-ray techniques, to high-end instruments with advanced analytical capabilities. Among the instruments on display at the event will be the fifth generation [Rigaku MiniFlex](#) benchtop X-ray diffraction instrument. The MiniFlex is a general purpose X-ray diffractometer that can perform qualitative and quantitative analysis of polycrystalline materials

More information about the MiniFlex benchtop X-ray diffractometer is available at www.myminiflex.com.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,100 people in the manufacturing and support of its analytical equipment, which is used in more than 70 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
