iPatientCare Announces Additional Users Selecting to Adopt to iPatientCare Revenue Cycle Management Services in the State of Wisconsin

Chiropractic Health Services, Wisconsin Switches to iPatientCare EHR and Revenue Cycle Management Services

WOODBRIDGE, NEW JERSEY, November 30, 2015 —iPatientCare, Inc., a pioneer in cloud-based ambulatory EHR/ Practice Management System and Value-Added Revenue Cycle Management Services, announced signing up Chiropractic Health Services, one of the prestigious and high-volume practices in the State of Wisconsin.

iPatientCare EHR has been admired by quality-focused healthcare providers nationwide because of its ease-of-use, customizable workflow and templates, and agile and prompt support. Chiropractic Health Services, led by Timothy S. Wakefield, DC and located in Wisconsin, was looking to work with a Chiropractic billing focused RCM company which also owned the Intellectual Property Rights to the EHR and Practice Management System utilized for the Meaningful Use and RCM services.

Chiropractic Health Services is a busy practice, seeing more than 60 to 70 patients per day. It was also looking for a solution that gave the practice peace of mind by staying compliant with Meaningful Use Stage 2 and beyond and HIPAA Omnibus Rule. CHS was determined to seek a full-service vendor and value-added service provider which not only gave them a specialty-focused EHR but also the complete service offerings of Revenue Cycle Management and Meaningful Use/PQRS/PCMH equivalent PCCC reporting dashboard and registry solution.

"We were looking for a one stop solution that can provide fully loaded features with an EHR program that interfaces with a practice management system, complete range of Revenue Cycle Management services, an experienced data conversion process, prompt IT services, and detailed MU monitoring and reporting. We were looking for a long-term solution to our needs of electronic healthcare and revenue cycle enhancements. We had to be confident that the system we chose was able to keep up with the changes that appear to be facing us, as it relates to: the new merit-based incentive payment system, promotion of alternative payment models, and incentive payments for participation in eligible alternative payment models. Looking at what we were searching for, it was a challenge for our practice to find a right solution. We found all we needed with iPatientCare. We were amazed to learn that iPatientCare provides high quality of revenue cycle management services along with the best technology solution. With as hard as iPatientCare has worked to be on the cutting edge of technology, we are confident that we made the right choice for the long-term benefit of our practice from the RCM point-of-view as well.", said Timothy S. Wakefield, DC, Chiropractic Health Services, Wisconsin.

Udayan Mandavia, CEO, iPatientCare commented, "iPatientCare has a track record of Corporate growth based on well-thought out strategies. Having achieved a critical mass of healthcare providers from the primary care and key specialties, iPatientCare has been focusing on adoption of its product suite and value-added services by some of the specialties which need highly engineered products and responsive services. We look forward to helping CHS and many other Chiropractic practices nationwide with our full range of value-added services in 2016 and beyond."

About iPatientCare

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.
