TRIAGE CANCER JOINS WITH MEDOCITY TO SUPPORT CANCER PATIENTS

Partnership Elevates Patients and Survivors Care in a New Innovative Way

Los Angeles, CA – (November 19, 2015) – Triage Cancer today announced a new partnership with Medocity, Inc. to provide valuable information and practical tools about cancer survivorship on the Medocity iCancerHealth platform. This new collaboration will help ensure individuals with cancer have information about access to health care, treatment options, psychosocial care, survivorship care planning and other practical challenges that arise after diagnosis.

Triage Cancer works with cancer community partners, health care professionals, and other experts to connect people to relevant, practical information about cancer survivorship issues. Medocity launched iCancerHealth to provide a holistic patient-centric support to cancer patients.

"We share a common mission with Triage Cancer to empower cancer patients, survivors and caregivers in the task of managing care at home," said Raj Agarwal, Medocity Chief Executive Officer and President. "This partnership further enhances our goals of offering coordinated care, engagement and education to cancer patients, and we look forward to making a positive difference in their lives."

"When someone is dealing with a cancer diagnosis, there are so many different things they are faced with: decisions to make and information to learn. Trying to juggle it all can be incredibly overwhelming," said Joanna Morales, Triage Cancer Chief Executive Officer. "Our goal is to provide access to quality information about all types of cancer survivorship issues. From the practical issues of managing finances and insurance to the emotional and spiritual well-being after cancer, having these tools and resources empowers survivors."

iCancerHealth is an intuitive, comprehensive platform that bridges the gap between the clinic and the patient's home that:

- Enhances patient care by providing self-care tools to Manage/ track medications, symptoms and treatment plan and share progress with clinical team;
- Guides patients and caregivers with timely disease and drug specific information; and
- Shares and connects with the patient's care team, family and friends

By supporting patients and improving communication with their caregivers and health care teams, Medocity hopes to effect the overall quality of support that a patient receives during and after their journey with cancer.

The use of app has been donated by Medocity to Triage Cancer for its constituents and is available for free download at the App Store, Google play and on the Web at http://triagecancer.org/icancehealth.

About Triage Cancer
Triage Cancer is a national, nonprofit organization dedicated to helping the radically escalating number of people with cancer, their families, caregivers, advocates, and health care professionals successfully navigate the entire spectrum of cancer survivorship issues. Triage Cancer provides educational events, online tools, and resources, as well as hosts a national speakers bureau of experts in cancer survivorship. To learn more, visit www.triagecancer.org.

About Medocity
Medocity's mission is to provide a virtual coordinated care platform that bridges the gap between the clinic and the patient's home. This is accomplished by managing the patient's care utilizing a proprietary, interactive and rules-based mobile solution designed to engage patients, optimize their journey, improve quality of care, and effectively reduce avoidable health care costs in the system. Our vision is to provide a variety of offerings in multiple disease states that will ultimately enable transformation and innovation of healthcare delivery and patient care.
