Stertil-Koni Introduces Portable, High-Intensity LED Lighting System with Multi-Position Magnetic Base: Palm Light

For Immediate Release:

Stevensville, MD, December 14, 2015 —Vehicle lift leader Stertil-Koni has announced that it will introduce a portable, magnetic, high-intensity LED light designed to affix easily to a broad range of metal surfaces commonly found in vehicle maintenance shops, including the company’s award-winning vehicle lifting systems.

Called “Palm Light,” this new piece of shop equipment will be available in the first quarter of 2016 and provides up to 800 lumens of directed light and is contained in a robust, die-cast aluminum housing – making it capable of withstanding much more than the common knocks, bumps and drops that are part of the everyday shop environment.

The 10 watt Palm LED Light is powered with a lithium-ion 11.1 Volt 2200 mAh battery, is IP65 dust and water resistant and comes with a 12.6 V 0.8A charger with a magnetic charging base – all as standard.

Noted Peter Bowers, technical sales manager at Stertil-Koni, “Providing portable, area-specific under-vehicle lighting is vital to ensuring shop safety and efficiency. That’s precisely why Palm Light is such a powerful and affordable solution. Whether technicians are doing routine maintenance, removing components or installing new parts, Palm Light will definitely brighten the environment and help reduce overall repair time.”

About Stertil-Koni

Stertil-Koni, a brand of the Stertil Group, is the global market leader in heavy duty vehicle lifts – [bus lifts](#) and [truck lifts](#) – and is the preferred supplier to the world’s leading companies in the truck and bus industries.
