

UniversalTypeServer 6

COMPLETE FONT MANAGEMENT

Organise, Sync and Distribute Your Fonts.

Your Team's Font Manager

Managing your fonts with Universal Type Server fuels your team's creativity and productivity. Store all of your fonts in a centralised, server-based font manager to ensure consistent, worry-free font usage across all of your projects.

Easy to Administer

Universal Type Server makes it easy to keep your team on task with minimal effort. Simple to setup, IT professionals love how easy it is to maintain reliably. Many Admins often admit that they "Set it and forget it!"

Ensure Creativity and Font Discovery

Give your team easy access to the typographic resources they need to stay productive. Fonts are automatically distributed to your team, and the Universal Type Client makes it easy to browse, compare, search, discover and use fonts in projects.

Integrate with Your Professional Tool Set

Optimised for Adobe Creative Cloud® 2015, Apple® OS® X El Capitan and Microsoft® Windows® 10, Universal Type Server is ready to step into your office.

Compliance and Control

Fonts are licenced like any other piece of software, but not always treated as such – traded, shared and even emailed. Prevent costly font licence issues from catching your team off guard with Universal Type Server.

Universal Type Server 6 Product Editions

Enterprise Edition

The most robust font management solution available, the Enterprise edition brings control, compliance and reporting to your font collection for all users, whatever their part in the creative process.

Professional Edition

Industrial-strength, the Professional edition is for organisations that need to support many users with simplicity and reliability.

All Editions Include

Professional Auto-Activation

Font Sense[™]—powered auto-activation plug-ins for Adobe InDesign®, Illustrator®, Photoshop®, After Effects®, InCopy® and QuarkXPress® activate the precise font used in a document.

Worry-Free Administration

Renowned by IT professionals as a solution that is easy to configure, and comforting in its reliability, Universal Type Server just works.

Powerful Creative Tools

Put your fonts to work with the creative toolset in the Universal Type Client that extends into Adobe Creative Cloud and Creative Suite with convenient font panels.

Track your team's font usage and save on font licencing costs.

Professional Edition Features

Directory Services

Manage users through LDAP Integration using either Active Directory or Open Directory.

System Font Policies

Gain complete control over font usage, even in your user's operating system fonts folders with System Font Policies.

Online Font License Management

Manage font licenses from a single convenient online web interface.

Enterprise Edition Features

Universal Type Server Enterprise edition includes all features of the Professional edition, plus the following:

Font Licensing Enforcement

Font licensing enforcement options allow you to limit the number of users for licensed fonts.

Robust Font Usage Reporting

Configurable reports provide insight into how fonts are used and licensed in your workflow, helping you define a precise font licensing strategy.

Server Failover

Ensure maximum server uptime by configuring a failover server that automatically takes over in emergency situations.

InDesign Server Connected

An optional FontLink module connects to publishing automation systems.

For more information and system requirements see www.extensis.com/universal-type-server

Font Compliance for All Users

An optional Type Core Client extends font compliance management to all users, even those outside the creative workgroup.
