

## **iPatientCare EHR and Revenue Cycle Management: A Winner Among Medical Offices Switching EHRs**

### ***iPatientCare's Clinically-driven Billing Services Helped in Achieving a Record Number of Ambulatory Practices Switching Their EHRs in the Calendar Year 2015***

**Detroit, MI**, December 29, 2015 — iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR and integrated practice management solutions, announced today a record number of conversions from technology-only subscription model to value-added billing/[RCM services](#) business model from the beginning of the calendar year 2015.

Electronic records (EHR/EMR) changed the way a medical practice provides care to its patients. The [technology-assisted services](#), such as, appointment scheduling, eligibility verification, electronic prescribing/refills, workflow, clinical templates, integrated lab/test results etc. have enabled most medical practices to provide better and faster care to their patients.

However, some of the challenges medical practices face are their existing EHR vendors deciding not to continue with their ONC Meaningful Use certifications, getting clumsier and less-user-friendly as they add new features, and get acquired or stop growing their products/services as going gets tougher.

“iPatientCare has succeeded because of its extremely easy-to-use yet functionally the best [EHR that is cloud-based](#) and extremely affordable. Additionally, it provides integrated Practice Management and Patient Portal Systems, Secure Direct Address for e-referrals, ePrescribing for Controlled Substances, PQRS Registry, and many such important features which are needed as a base technology for the MU/PQRS reporting. Add top-notch billing expertise, vibrant back-office working 24 x 5, and KPI dashboard and numerous reports... and you have got the best RCM services at the most cost-effective rates”, commented Udayan Mandavia, CEO, iPatientCare.

“Medical practices looking to switch their EHR heard what iPatientCare had to offer. Significantly low rates at 3.9% of monthly collections, dependable outsourced billing services, reductions in Days in A/R, 360 degree view of practice financial performance using iPatientCare dashboards and reports, improved denial resolution and maximized cash flows, in addition to the excellent EHR and integrated products for free! I guess, the decision was very easy for the most.” - said Tejhas Vyass, iPatientCare’s Senior Billing Application Specialist and Project Manager.

As iPatientCare continues to grow robustly and organically based on its clear vision and growth strategies, providing value-added services of RCM/Billing and Quality Improvement Consulting are extremely intriguing and worth observing was an overall voice heard at company’s recent briefing to financial advisors and analysts.
