Tile joints

Coatings and floor coverings

Our accessory highlights.

FEIN Precision BiM E-Cut:

FEIN has applied the proven principle of Japanese teeth to the FEIN E-CUT, perfected it and recreated it in bimetal. The results are greater strength, resistance, speed and outstanding cuts.

FEIN E-Cut long-life saw blades:

Our FEIN E-CUT long-life saw blades effortlessly cut through a wide range of wood types and last up to three times longer than standard blades. For longer, more effective and more precise cutting.

New 3D shape

- ▶ The special geometry produces greater rigidity which makes more even, smoother movements possible.
- ▶ Works with noticeably more precision, is quieter and delivers more accurate a cut.
- ▶ Up to 25% more work progress.

**NEW
BiM
Blade**

Starlock Mounting

Starlock Mounting: never before has changing tool been faster or easier. The new Starlock mounting system* allows tool changes within 3 seconds. Quicker and safer system which, leads to less injuries and higher efficiency.

Construction

The stainless steel constructed mount adds strength and rigidity to make sure users get the most from their multi-tool.

Best cutting quality

- ▶ Shortened, specially ground corner teeth prevent the blade from breaking loose.
- ▶ Outstanding cutting speed without fraying.
- ▶ Easier positioning of the saw blade.
- ▶ Faster and more constant work progress.
- ▶ Three times longer service life due to bimetal teeth.
