LUCAS NAMED TO FOOD LOGISTICS FL100+ LIST OF TOP SOFTWARE AND TECHNOLOGY PROVIDERS FOR FOOD AND BEVERAGE

Foodservice, Grocery, and Beverage Distributors Continue to Utilize Lucas Mobile Work Execution Solutions to Improve Distribution Center Efficiency, Enhance Product Traceability, and Achieve Outstanding Order Accuracy

PITTSBURGH, PA, January 12, 2016 – Lucas Systems, Inc., the leading provider of solutions for intelligent mobile work execution for warehouses and distribution centers, has been named to the 2015 FL100+, Food Logistics magazine’s list of the top software and technology providers to the food and beverage, grocery, and foodservice distribution industries. Leading producers, distributors and retailers have long-relied on Lucas solutions to optimize DC operations, and this year growing numbers of companies have installed Lucas mobile work execution solutions to replace legacy voice-picking solutions, dramatically improving accuracy and efficiency and recognizing a rapid return on investment.

The editors of Food Logistics annually recognize the software and technology providers that help food and beverage manufacturers, foodservice distributors, and grocery retailers reach their operational goals. The FL100+ is comprised of software providers as well as equipment and technology companies whose products and services play a significant role in food and beverage supply chains.

“Developments in the software and technology sector are generating new opportunities for growers, food manufacturers, grocery retailers and the many logistics providers that support them,” notes Lara L. Sowinski, editor-in-chief at *Food Logistics*. “Moreover, cloud-based solutions and mobile connectivity are helping create tools that are more flexible, affordable, and responsive, making software and technology even more valuable to those in the global food supply chain.”

“We are honored to once again be included on the list of technological innovators in the food and beverage industries,” says Jeff Slevin, Chief Operating Officer of Lucas Systems. “The most important industry recognition to us, however, is from the many companies that are upgrading from WMS-directed RF and voice technology to Lucas mobile work execution solutions that optimize efficiency while meeting demands for improved product traceability and better order accuracy.”

About Food Logistics

opportunities for some of the world's most recognized B2B brands. Its diverse portfolio serves the construction, logistics and supply chain and other industries with print, digital and custom products, Webinars, events and social media.

About Lucas Systems, Inc.

Since 1998, Lucas has pioneered intelligent mobile work execution solutions for mobile workers and distribution center managers. Customers like Cardinal Health, the Container Store, C&S Wholesale Grocers, HD Supply, OfficeMax, Mondelez, Kraft and Rust-Oleum trust Lucas to deliver solutions that greatly improve worker productivity and accuracy because Lucas truly understands warehouse operations. Lucas Mobile Work Execution solutions optimize hands-on processes and seamlessly combine voice, barcode scanning, and other mobile technologies to improve worker productivity, eliminate errors, and boost end-to-end DC efficiency, while also giving managers and supervisors real-time reporting and management tools that help them better manage their operations.
