

DQE Brings Innovation to Emergency Preparedness Training with its New Release of DQE-On-Demand® eLearning for Healthcare Preparedness

FISHERS, IN/ January 12, 2016/PRESS RELEASE/- With disaster events in the news every day, the necessity of keeping hospital staff up to date with emergency preparedness training is more important than ever. DQE-On-Demand eLearning for Healthcare Preparedness eliminates many obstacles to keeping a well-trained staff by providing online learning to students 24 hours a day, seven days a week. DQE-On-Demand uses engaging animation and professional audio to teach hospital emergency preparedness procedures and skills clearly and effectively. Now, DQE-On-Demand has released a new look and additional features that provide enhanced functionality Emergency Preparedness Program Administrators and their emergency management staff.

DQE-On-Demand new features include:

- A clean new design with easy, fast navigation.
- Availability on mobile devices, providing even more ways to learn.
- Used seats don't expire. Don't worry about your seats expiring before you've had a chance to use them.
- A new dashboard displaying progress, preparedness news headlines, and facility bulletins.
- Updated course content with the latest standards and best practices for Decontamination, Evacuation, and Hospital Incident Command (HICS).
- A student self-enrollment feature that saves administrative time.
- Quick and easy progress reports that are simple to export.
- New reference material for enhanced learning opportunities.
- An Upload Zone to store important emergency management documents in a central location.
