

FOR IMMEDIATE RELEASE

Greene, Tweed Opens Elastomer Center of Excellence for Semiconductor Market

Kulpsville (January 2016) – Greene, Tweed has announced the opening of their **Elastomer Center of Excellence**. The facility, located at Greene, Tweed’s Advanced Technology Group Headquarters in Kulpsville, PA, is dedicated to the development of new elastomer compounds for the semiconductor market.

The official opening of the Center of Excellence (CoE) was January 11. The new centerpiece of the CoE is an all-inclusive 2,200 square-foot cleanroom featuring several new process systems that reflect the highest industry standards for lab capabilities:

- Internal Mixers
- Roll Mixers
- Extruders
- Press Systems
- Post-Cure Ovens
- Inspection Systems

Greene, Tweed’s new CoE cleanroom allows for the complete integration of elastomer development – from initial raw material mixing & development to final product packaging for new semiconductor compounds. These capabilities, now housed in a single cleanroom environment, allow Greene, Tweed to deliver the highest quality product with industry standard contamination controls.

“Greene, Tweed has a rich history of semi innovation. Over 20 years ago, we developed the first compound dedicated to the specific needs of semiconductor processing. Today, customers around the world trust our elastomer solutions for their critical semi applications,” says Glenn Doell, Senior Manager Advanced Technology and Business Development for Greene, Tweed.

“Our new Elastomer CoE allows us to develop new compounds in a more agile environment, so we can bring new and more innovative solutions to market faster. We’re excited about the many great things that our new CoE can do for us, and more importantly for our customers,” adds Doell.

A video tour of the Elastomer Center of Excellence is available online at <http://go.gtwweed.com/elastomer-coe/>.

About Greene, Tweed

Greene, Tweed leverages expertise in a variety of markets and products to give customers the most innovative solutions to meet performance challenges and reduce total cost of operation. With fully qualified engineering, sales, and support personnel located throughout the Americas, Europe, and Asia, Greene, Tweed delivers solutions to individual customer applications on a global scope. Greene, Tweed products are sold and distributed worldwide.
