

## Slone Partners places VP of global business development at CollabRx

### *Veteran life sciences executive to lead clinical decision-support company's growth efforts*

National recruitment firm [Slone Partners](#) is pleased to announce the placement of Adrienne Craig-Kennard, a life sciences executive with extensive international business development experience, as vice president of global business development and strategic alliances at [CollabRx](#), a leading clinical-decision support company.

CollabRx, a wholly owned subsidiary of [Rennova Health](#), delivers expert solutions in precision oncology that enable physicians, laboratories, payers, and providers to achieve standardized, evidence-based care and superior clinical outcomes. Its goal is to provide physicians the ability to rapidly and accurately identify relevant drugs, clinical trials, diagnostics, medical tests, and therapies associated with specific genetic profiles of their patients.

“Adrienne is a scientist and a businessperson,” said Thomas Mika, CEO of CollabRx. “Her grounding in these two distinct components of our industry has produced global success, and we are thrilled she is joining our team.”

Ms. Craig-Kennard said, “CollabRx is at the forefront of advancing precision oncology care. As personalized medicine continues to advance at an incredible rate, I am delighted to have this opportunity to be part of a team that is making a difference in patient care.”

Adam Slone, chief executive officer of Slone Partners, said, “It is rewarding to have been a part of this placement, because it means bringing together a precision oncology decision support company and an executive who has devoted her training and career to patient care, innovation, and business development.”

During her 15 years in the pharmaceutical, biotechnology, and bioinformatics industries, Ms. Craig-Kennard has served in research and product development roles as well as business development and operations. Prior to joining CollabRx, she was vice president of global clinical informatics sales for Strand Life Sciences, where she led global sales of software as well as services for translational research and next-generation-sequencing-based clinical diagnostics.

Ms. Craig-Kennard received a bachelor of science in chemistry from the University of California, Berkeley and a master's degree in business from the Grenoble Graduate School of Business in France.
