

## Atmosera Hires Vice President of Engineering to Drive Innovation and New Offerings

*Scott Harvey leads efforts to realize the company's vision of delivering Azure hybrid solutions to companies and application developers worldwide*

### News Summary

PORTLAND, Ore. - - January 26, 2016 - - [Atmosera](#), the provider of fully managed Azure hybrid solutions, today announced that Scott Harvey has joined the executive team as Vice President of Engineering. Scott brings deep expertise driving innovation and efficiency for mission critical products and services. Scott is now responsible for defining and executing the development of Atmosera's new hybrid services including the evolution towards an increasingly software-defined cloud service platform.

Atmosera is already a leader enabling clients to run their mission critical applications in hybrid cloud environments and Scott is focused on developing additional value. A key goal is to help clients seamlessly take advantage of multiple deployment methods including private and public [Microsoft Azure](#) clouds, hosted environments, and advanced security and compliance capabilities. Scott is also going to drive incremental intellectual property aimed at easing the process of moving client workloads between different deployment methods and cloud providers.

### Supporting Quotes

- "As clients continue to deploy applications in hybrid environments, there are some clear opportunities to solve unique and challenging problems and make it easier for clients to accelerate taking advantage of what cloud computing can deliver," said Jon Thomsen, Chief Executive Officer at Atmosera. "Scott is the latest addition to our deep bench and brings the necessary experience to help us drive the next wave of innovation."
- "Atmosera has an amazing opportunity to take advantage of some early adopter trends and bring to market solutions that make Microsoft Azure hybrid clouds the solution many companies and application developers demand. I am excited at the opportunity to lend my expertise driving innovation and bringing to market compelling offerings," said Scott Harvey, Vice President of Engineering at Atmosera.
