

Virtual Meeting Rooms

Video Conferencing Solutions for For Hospitals & Healthcare

VideoCentric's Virtual Meeting Rooms for the Healthcare Sector enable healthcare professionals to enter a virtual meeting space from a video conferencing system, desktop or mobile device and join face-to-face with doctors, hospitals, specialists and patients from around the world, wherever they are located.

With VideoCentric's Health365 Virtual Meeting Rooms, you can hold unlimited secure, reliable and High Definition video based communications without technical frustrations and costs associated with traditional video conferencing, and without being bound by the walls of your meeting room.

Health365 Virtual Meeting Rooms give you:

- Professional HD video conferences with clean, crisp audio quality
- Multipoint connectivity between meeting rooms, hospitals, board members, specialists & surgeons
- Presentation & collaboration features you are used to in a physical meeting
- Secure access for participants wherever they are located
- Professional features including encryption, recording & management
- Plug & Play 3D Medical Imaging
- The UK's most experienced video conferencing team to manage & support you.

PROFESSIONAL & SECURE MEETING SPACES

Health365 Virtual Meeting Rooms have been designed for professionals who require the highest quality images and audio, whilst ensuring resilience & security for all your healthcare needs.

Hosted in the UK's most energy efficient datacentre with ISO 27001 security, Health365 VMR's enable hospitals to extend video to the desktop, mobile and remote workers, whilst enabling more than two locations to be part of a single video call. With security features including AES encryption and PIN entry, and the ability to interoperate with all the world's leading video conferencing solutions, Health365 VMR's provide the highest quality medical imaging around the globe, easily & securely.

WHY VIDEOCENTRIC?

COMPREHENSIVE OFFERINGS

With a single monthly cost per room with no capital outlay, a Health365 VMR is easily affordable, with the return on investment being realised within the first month of adoption - no expensive upfront costs of infrastructure, no maintenance of equipment, no software upgrades and no server storage space.

VIDEO SOLUTIONS FOR HEALTHCARE

Video Conferencing & Collaboration Solutions for the Healthcare sector aims to aid patient centred care and enable medical professionals to practise medicine more efficiently and at less cost.

Video Conferencing has been proven to reduce unnecessary re-hospitalisations and accelerate patient care, whilst improving efficiency, quality of service and reducing costs associated with travel, education, administration and management. With VideoCentric's Healthcare Solutions you can:

- Extend reach for higher quality interaction between doctors, nurses & patients
- Enhance healthcare team meetings via multipoint collaboration
- Improve communication between the Department of Health, Board of Governors, Hospital Management and medical specialists nationwide.
- Offer more effective education & training of hospital staff & clinicians - locally & remotely
- Increase referrals & strengthen relationships with related health facilities
- Offer the ability to record, stream & distribute video, audio & content for lectures, consultations, meetings and training.

Highest quality, specialist solutions

As a leader in interoperability & video solution integration, VideoCentric's Healthcare Solutions & Health365 VMR's have been designed to interoperate with the highest quality video solutions, specialist equipment and other video services, to ensure superior delivery of video communications.

- HD video technology via the world's leading & most trusted codec & medical camera solutions
- 3D cameras & visualisers for 3D medical imagery
- Remote collaboration solutions
- Karl Storz OR1 & OR solutions

Expert Partnerships

In partnership since 2006, VideoCentric & Karl Storz Endoscopy provide the most interoperable, creative, versatile & competent video communication solutions for the healthcare sector. VideoCentric and Karl Storz offer the highest quality solutions - designed, installed, trained & supported by experts in both the video & medical world.
