

iPatientCare Successfully Integrates with Wellcentive to Move One Step Ahead Towards Managing the Care Process for Populations

iPatientCare, Inc. announces its practices up and running successfully with Wellcentive to transform healthcare and provide superior clinical, financial and human outcomes

Woodbridge, NJ, February 29, 2016 —iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR, integrated Practice Management and Value-Added [Revenue Cycle Management Services](#), is glad to announce its successful integration with Wellcentive to provide superior clinical, financial and human outcomes to its end users.

[Wellcentive's](#) platform focuses on the transformation to value-based care for health systems, physicians, accountable care organizations, employers and payers pursuing clinically relevant population health management solutions. The technology aggregates patient data across all points of care, applies analytics to identify and stratify patient health, trends and risk, to proactively manage patient health and forecast outcomes and costs for populations.

With this successful integration, iPatientCare users would be able to submit their patient's data to Wellcentive on a real-time basis which would be available to any other EHR user who has integrated with Wellcentive. This is an important step toward [care coordination management](#) where physicians involved at the community level ultimately contribute to the population health management care delivery model.

"iPatientCare strives to make healthcare IT work efficiently at reduced cost. With constant innovations and achievements, we have helped physician practices improve efficiency with the best service to their patients. This successful integration with Wellcentive achieves one more step towards enhanced population health management," said Shahab Shaikh, Chief Integration Officer, iPatientCare.

"We have been using the iPatientCare EHR for many years, and with their interoperability standards and this latest integration with Wellcentive, our providers will be able to submit and obtain data from the Wellcentive network, which will help us to attain population care coordination management swiftly," said Manoj Dora, CIO, [Macomb Physician Group](#)
