

MessageSolution Enterprise Email Archive

On-Premise, Cloud & MSP-Hosted Archiving & eDiscovery Solutions

MessageSolution Enterprise Email Archive (EEA) is a one-stop solution for compliance archiving, eDiscovery and storage management. It provides a secure, highly interactive data store and high-performance eDiscovery system for corporate email systems. EEA drastically reduces the cost and eliminates complications associated with data storage, recovery and information archiving. MessageSolution technologies also give users controlled and self-serving access to archived data.

Advanced eDiscovery, Litigation Support

MessageSolution performs Fuzzy, Wildcard and Proximity searches for comprehensive data collection. In addition, it offers comprehensive eDiscovery features such as universal legal hold, configurable third-party Legal/Auditor access, data redaction (a feature not commonly provided in standard email archiving systems).

MessageSolution also offers an advanced eDiscovery platform designed to direct

eDiscovery requests from IT to the legal team. Features include Multiple Case Management, Case-Specific Access Authorization and Review Delegation, Legal Annotation, etc.

MessageSolution Compliance Archiving

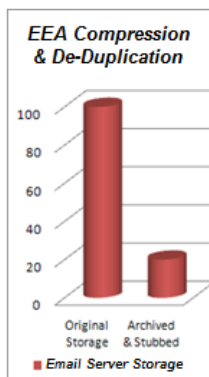

Use MessageSolution EEA for real-time compliance archiving. Achieve and maintain regulatory compliance by configuring granular data retention, automated data redaction and archive access policies for HIPAA, FOIA, SOX, FRCP, etc. with random sampling for compliance auditing.

MessageSolution also maintains unalterable search and data access logs to preserve chain-of-custody and enforce privacy.

Hierarchical Storage Management

MessageSolution EEA efficiently offloads the data from expensive email server storage to inexpensive hierarchical archiving storage. There is no user-pattern change on the client side, yet large portions of storage space are reduced both on the email and the archiving servers.

MessageSolution also leverages in process compression and Single-Instance-Storage to reduce storage requirements by up to 75% on the archiving server. After compression, data is also stored in an easy-to-maintain and secure format.

MessageSolution Architecture & Solution Flexibility

MessageSolution Platform does not require any additional database or software licensing. The solution is the most scalable solution on the market and can archive for 25,000+ users on one server or for several hundred thousand in a clustered multi-server environment. This makes it ideal for both enterprise and the cloud hosting ideal for SME organizations. MessageSolution also supports all popular email platforms.

Benefits

- On-Premise, Cloud and MSP-Hosted Solutions Available
- Policy-Based & User-Determined Retention Options
- Built-In eDiscovery Features
- Configurable 3rd-Party Legal/Auditor Access
- Archives All Email Content - Messages, Attachments, Contacts, Calendar Items & Metadata
- Reduce Archiving Storage Requirements by up to 75%
- Granularly Controlled Archive Access
- Eliminate Local PST/NSF/GroupWise Files
- Save up to 80% of Email Server Storage
- Reusable Software Licensing
- Self-Serve Data Access - Download, Restore to Email Server, Send to Email Recipient, or Print Archived Data

Information Archiving System Minimum Requirements:

Pentium IV 2.0GHz
Processor equivalent to your email server recommended)
2 - 4GB RAM
40GB hard disk (additional space or disk array, NAS, SAN for storage)
Internet Explorer 6, Firefox (User)
1 Network Interface card
DNS service access
Linux 2.6, Windows 2000+, Solaris

Enterprise-Class Email Archiving, eDiscovery & Migration

Why MessageSolution?

- **No 3rd Party Software Requirements**
- **Cloud, On-Premise & Service Provider- Hosted Solutions**
- **Intrinsic eDiscovery Features**
- **Direct Email Client Integration**
- **Global, On-line Deployment & Support**
- **Industry-Leading Scalability -**
Ideal for both Enterprises and SMEs, will scale with corporate growth
- **Unified Solution –**
for Email, SharePoint & File System Archiving, eDiscovery & Data Migration
- **Unique Architecture -**
specifically designed for high-volume unstructured data
- **Solution Flexibility**
Supports all major email platforms including hosted platforms like Office 365 & Google Apps

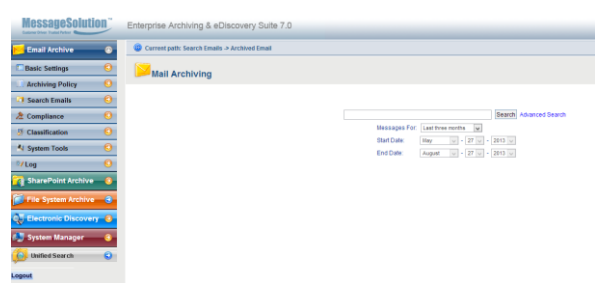

Supported Email Platforms

- Microsoft Exchange
- IBM Lotus Domino
- Novell GroupWise
- Linux/UNIX-Based Servers
(PostFix, ProxPath, SendMail, IMail, Scalix, Zimbra, Qmail, Kerio, Sun Server, etc.)
- Hosted Email Platforms: Office 365, Google Apps, etc.

How MessageSolution Enterprise Email Archive (EEA) Works

MessageSolution EEA collects, replicates, compresses and indexes all data for advanced searching, eDiscovery and compliance management. Archived data is almost immediately available for retrieval for business-critical situations, audits or eDiscovery requests.

In addition to archiving the contents of email messages, EEA transparently captures, indexes and archives all compliance-related metadata, messages, attachments, contacts and calendar items without impacting end-users.

MessageSolution Enterprise Email Archive 7.0
Web Console Admin UI – Search Interface

With configurable and highly granular access controls, users can retrieve their own data or data from custodian accounts without IT involvement. After locating the necessary data, it can be restored to the email server, emailed, downloaded or printed.

MessageSolution Enterprise Email Archive supports most corporate email environments

including Microsoft Exchange 5.5-2013 and Office 365, IBM Lotus Domino 6.5-8.5, Novell GroupWise 7.0-2012, Google Apps and Linux/UNIX-based email servers.

Cross-Platform, Legacy Server & Data Import Email Migrations

In addition to supporting archiving for all major email platforms, MessageSolution also offers Cross-Platform Email Migration (I.E. GroupWise to Exchange), migration from legacy email servers (Exchange 2007 to Exchange 2013) and data import migrations.

Email Client Integration

MessageSolution Enterprise Email Archive Professional Edition and Suite Edition also offer direct email server integration through the Email Client Plug-in.

The Email Client Integration offers:

- Searching & Access to Archived Data Through Email UI
- Seamless Data Offloading from the Email Server
- Offline Archiving

Microsoft Outlook EEA Integration

Email Archiving in the Cloud

In addition to on-premise archiving servers, MessageSolution offers secure and hands-off archiving solutions. With AES and SSL security, regularly audited SSAE Type II data centers, and granular user-access control, MessageSolution offers all the safety and functionality of enterprise archiving without the overhead costs or daily management. MessageSolution also integrates with Microsoft Azure, IBM SmartCloud, Savvisdirect, OpSource, Amazon EC2, etc.

About MessageSolution

MessageSolution, an industry leader in enterprise information archiving and eDiscovery, provides Cloud, on-premise and MSP/ISP-hosted, multi-tenant platforms for email, SharePoint, and file server environments. Manage compliance, legal and storage needs. MessageSolution is the recipient of multiple industry awards for providing best Enterprise and Cloud Archiving Platforms including Gartner's annual Magic Quadrant Report
