

Gintzler International Celebrates Over 100 Years of Packaging Excellence

Gintzler International, a provider of custom label and product identification packaging solutions, is celebrating over 100 years of packaging excellence in 2016. The Gintzler commemoration will span through 2016 as the company highlights key moments in its history, hosts events for employees, visits loyal customers, and conducts a series of community service projects and special celebrations.

While very few companies in any industry have withstood the test of time to celebrate over 100 years, Gintzler International is proud to be a packaging supplier claiming this distinction.

The celebrations and community service events will take place in Buffalo, NY, where Gintzler first opened its doors as a small storefront print shop, as well as in Liberty Hill, TX, where Gintzler International also operates at its second location (formerly known as International Print and Packaging). The events will serve as a way to recognize and thank the customers, suppliers, employees, and communities who have helped make Gintzler International successful through the years.

“We are privileged to be here today due to the ongoing support that we have received from our loyal customers, as well as the steadfast dedication and hard work of our incredible staff. We want to take the opportunity to thank them for their continued confidence and business,” said Bryan Scheible, CEO of Gintzler International.

Scheible adds, “Our company was founded on entrepreneurial spirit, hard work, and innovation, all of which remain firmly rooted in our culture and will continue to lead us into the future. As we look to our next 100 years, our commitment to our people, technology, and innovation will continue.”

About Gintzler International

Today Gintzler International is privately owned and operated by Bryan and Mary Scheible, employs approximately 90 employees, and operates within state-of-the-art facilities. It is a leading narrow web label, shrink sleeve, and product identification printer and converter, specializing in servicing the prime consumer product and pharmaceutical packaging industries.
