Here Are 5 Great Things That Da'Wax Will Do For You!

"This is truly the best wax I have used! I have tried so many different branded products in the past (believe me I have tried most!) but I have always have had problems finding a wax strong enough to hold my hair which I can style and to still keep it having a natural look ... Well not any more! this is fantastic! Every thing about it is great even the tub looks great! I will definitely be buying from you guys again. Thanks!" - Madgaz

1. The moment you apply Da'Wax you will notice how strong it is! That is why you only need to use a very small amount.
2. You never have to worry about a greasy build up nor problems with washing it out. Da'Wax is water soluble. It can be applied to wet, damp or dry hair.
3. With the right application, your hair will have a natural matte finish, and nobody will ever notice that you are using a hair wax.
4. Da'Wax comes in a top-quality bamboo container and is presented in a cool Hessian gift bag. We have shunned cheap plastic tubs with metal lids, so it looks fantastic on your shelf or in your bag. We hope that you will love the packaging so much that you will easily find other uses for it when it is empty.
5. Lastly, we have tried to be as green as we can be. We did this, by avoiding potentially dangerous toxic build up of parabens, sulfates or phthalates.

Now that you understand the results you will experience and the superior qualities of the wax you are using...I bet you'd like to know how to best to apply it...

FAQ's About Da'Wax

Q: Do you have a video about this product that I can watch?

A: Yes! We made a really good video for you about how to get excellent results. Go here to watch it:

[How to use Hair Wax](#)

Q: Can you re-work the shape of your hair with this product during the day?

A: You can re-work the shape of your hair by wetting your hair a bit. Just rub a bit of water on your hands and then run it through your hair. The water moisture will soften the wax temporarily before stiffening again soon after.

Q: I accidentally left the lid open, and Da'Wax has become hard in the tub. What can I do?

A: Unfortunately, like most cosmetics, you do need to remember to screw the lid tightly back on. However, you can try applying the wax to wet hands. The wax is water soluble so this should work reasonably well.
