

ENTERPRISE NETWORK SOLUTIONS

|| Private Fiber and Premium High Bandwidth Solutions ||

We serve a wide variety of business organizations from Pharmaceutical to Media & Entertainment. We understand that each enterprise has a unique set of requirements, with bandwidth and security at the top of most lists. Sunesys owns and operates extensive regional fiber networks in major metropolitan areas across the U.S. providing unparalleled speed, security, reliability, and flexibility.

■ SOLUTIONS

- **SunE** Switched Ethernet
- **SunEP** Managed Private Ethernet
- **SunWave** Private Wavelength
- **SunDF** Dark Fiber
- **SunIP** Internet Services

■ COST EFFECTIVE

Our solutions allow you to consolidate services over a single WAN, enabling you to simplify your network infrastructure. Our streamlined networks, combined with our high-bandwidth offerings, easy upgrades, and flexible terms with no up-front costs, offer one of the most cost-effective solutions available.

■ DEDICATED INFRASTRUCTURE

We use 100% Sunesys owned fiber for all of our wide area networks ensuring stability and reliability that other providers just can't match. Our private fiber options provide additional peace-of-mind as all traffic utilizes dedicated strands of fiber for an unparalleled level of security and reliability.

■ EXPERIENCE

We understand your unique set of challenges for a secure, reliable, and fast network. Sunesys has been providing fiber optic WANs for over 15 years amassing an ever-expanding network of over 16,000 route miles in over 30 states across the country.

Check out the Sunesys Mobile App for instant access to maps, news, and more.

Customer Testimonial

We've created custom solutions for a variety of top tier enterprises across the U.S. including VPLS. Sunesys provided VPLS with a dark fiber connection enabling 100Gbps communication between two VPLS data centers in Los Angeles.

“ *The benefit of going with a dark fiber network is that we're able to use our own equipment - giving us complete control and flexibility to increase bandwidth without additional costs. Sunesys was able to provide a cost-effective fiber optic solution to bridge the 40 km distance.* ”

Ted Mektrakarn
Chief Executive Officer at VPLS
