

CareConnection™

WANT BETTER OUTCOMES?

Start with better input.

CareConnection™

Wireless, immediate and error-free delivery of vitals and weights from bedside to EMR.

Put CareConnection to work in your organization to:

- ✓ Prevent readmissions with immediate alerts
- ✓ Improve care for higher-acuity residents
- ✓ Measure up to the standard of care required by your referral partners
- ✓ Increase clinical accuracy
- ✓ Free up valuable nursing time
- ✓ Eliminate data entry errors

Connecting Your Care

“If it isn’t charted, it isn’t done.”

Caregivers make rounds, collect vitals and weights, and manually record measurements on paper — but then struggle to find the time to get to a kiosk, desktop or tablet to key in that data. What are the results? Documentation errors, omissions, data transpositions and delays that compromise the quality of resident care and the efficient use of precious caregiver time.

A better way — paperless documentation at point of care

CareConnection, the premier solution designed for the long term care industry, fits seamlessly into your workflow, reducing the time and steps required to get information into resident charts and eliminating charting errors. Immediate access to clinical data and instant alerts prompt your clinical team to intervene more quickly — improving outcomes and reducing hospital readmissions.

How does CareConnection™ work?

The workflow is as simple as 1-2-3:

- 1 - Caregivers take vitals using rugged Vitals CareCarts and weights using Connected Scales.
- 2 - Caregivers review vitals and weight, automatically linked to the resident’s information, on an easy-to-use touchscreen tablet. One touch immediately sends the data to your electronic medical record (EMR) system via CareConnection’s cloud-based software.
- 3 - Clinical professionals receive alerts if vitals or weights breach your pre-defined thresholds to trigger rapid care plan intervention.

Comprehensive care

Our experienced team understands the unique challenges faced by skilled nursing facilities lacking biomed departments and the resources to manage technical issues. We deliver comprehensive support with one call for your medical devices and CareConnection software.

Find out how your organization can get started now!

Time is money — don’t keep throwing it away on slow, manual vitals and weights processes that risk error-prone results and documentation. Put CareConnection to work for your organization! Contact us to find out if your EMR vendor is on our growing list of partners. Visit our website, call us or email at info@constantcaretechnology.com.
