

Gold Shovel Standard Q&A

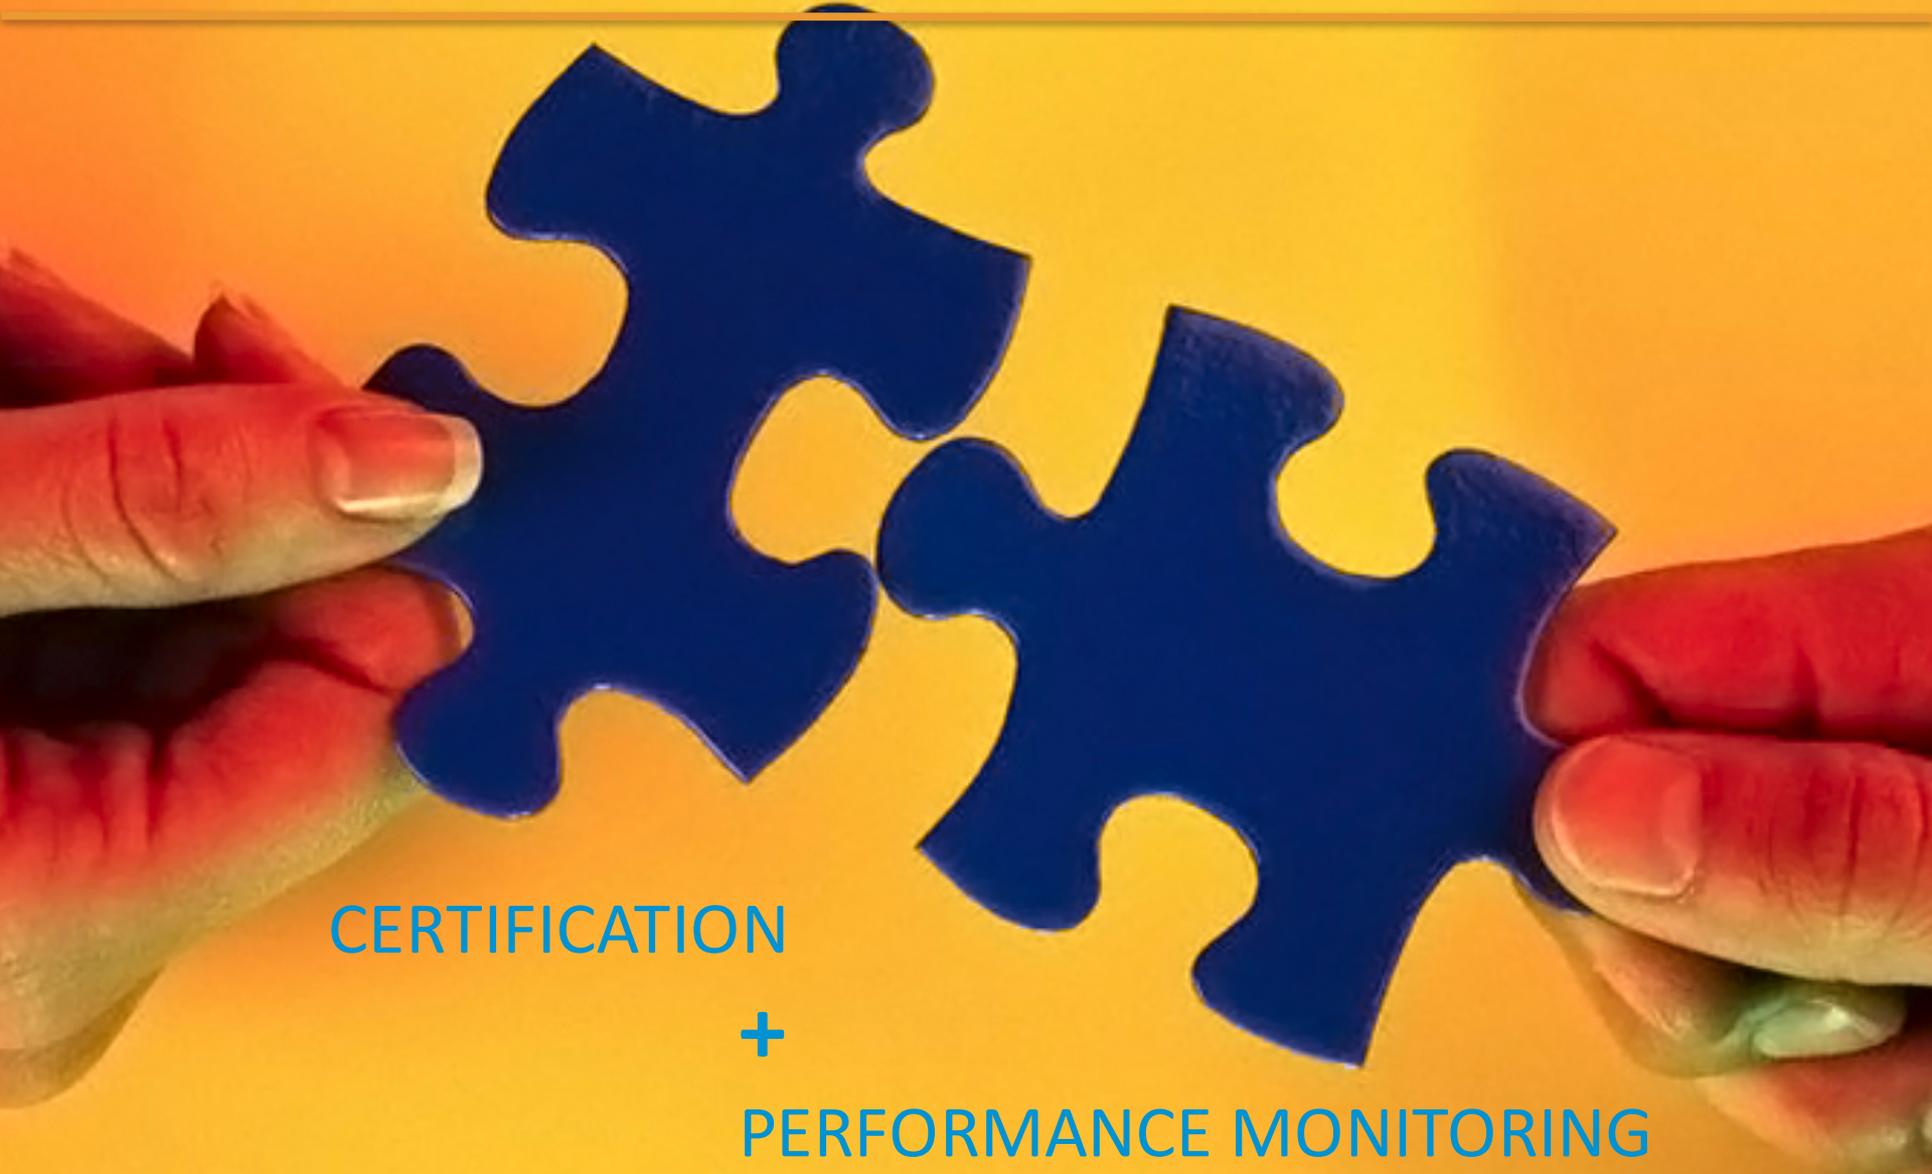

GSS in a slide

First broad scale attempt to slash damage rates on a North American scale through collaboration

Novel and ambitious program relying on collaboration and market forces through a single uniform system to dramatically curtail damage from excavation

2-Part Program

CERTIFICATION

+

PERFORMANCE MONITORING

Certification

ISO 9001 – Audited to have adequate quality systems

GSS – Audited to have adequate dig-in prevention plan

Performance Monitoring

FICO™ – Measurement of Credit Worthiness
EICO™ – Excavation Safety Worthiness

Low Barrier to Adoption

Gold Shovel Standard is a program which can be embraced without adding people or expending significant unbudgeted funds
