

ARE YOU TAKING UNNECESSARY RISKS WITH YOUR DMS?

PRACTICE SAFE SENTRY.

PROTECTED

Real-time web monitoring solution for *iManage Work*, enabling unprecedented access.

Catch unusual activity, make quick investigations and take timely action.

Monitor patterns and trends. Full audit history of notifications sent and actions taken.

UNPROTECTED

Inability to monitor sensitive matters, projects or client files in real-time.

Days or weeks can pass before unusual activity is noticed.

Inability to demonstrate to clients that you not only safeguard their content but are also able to quickly act on breach attempts.

“Sentry enables us [Nexsen Pruet], in real-time, to understand and act on the potential risks associated with data misuse or other activities that don't comply with our information security best practices. It's an invaluable tool.”
