

PRESS RELEASE

Stertil-Koni to Deploy ebright Smart Control System on its Battery Wired Mobile Column Lifts

For Immediate Release

Stevensville, MD, March 29, 2016 – Heavy duty vehicle lift leader Stertil-Koni has announced that it will now deploy its powerful touch-screen control technology – ebright Smart Control System – on select models of the company’s battery wired mobile column lifts.

These include the Stertil-Koni ST 1075, ST 1085, and ST 1100 models, with lifting capacities of 16,500 lbs., 18,500 lbs. and 22,000 lbs. respectively.

First deployed on the Stertil-Koni wireless mobile column lifts in 2015, the ebright Smart Control System consists of a seven-inch, full-color touch screen console that provides intuitive, ease-of-use with maximum visual information about the lifting process – all at the fingertips of the person who needs it most, the busy technician on the shop floor.

Noted Peter Bowers, technical support manager at Stertil-Koni, “The ebright Smart Control System is in essence an extension of the concept of human-machine-interface (HMI). It has been engineered to provide greater control of the vehicle lift in a very familiar, electronic notepad-style delivery system.”

Now, Stertil-Koni is bringing this technology to its more economically priced wired mobile column lifts, which also showcase the best in heavy duty hydraulic lifting, but use interconnecting communication wires rather than wireless connectivity.

Concluded Bowers, “It’s great news for our customers. They now have a more affordable option to put Stertil-Koni mobile column lifts featuring the ebright Smart Control System in their maintenance shops at a lower price point.”

About Stertil-Koni

Stertil-Koni, a brand of the Stertil Group, is the global market leader in heavy duty vehicle lifts – [bus lifts](#) and [truck lifts](#) – and is the preferred supplier to the world’s leading companies in the truck and bus

industries. Stertil-Koni's breadth of products meets all ranges of lifting needs and includes [mobile column lifts](#), two-post, four-post, in-ground piston lifts, platform lifts, half-scissors and its innovative axle-engaging, in-ground, scissor lift configuration, ECOLIFT.
