

LIQUID FLASHING

Sika® Roofing's Liquid Flashing is a white, two-component polymethyl methacrylate-based (PMMA) material for use on Sarnafil® and Sikaplan® roofing details. The product is perfect for detailing unusual shaped penetrations – such as I-beams, angle irons and pipe clusters – that would normally be flashed with high maintenance sealant pockets.

- Cures quickly after mixing to provide protection – rainproof in 45 minutes and can be recoated in just one hour
- Offered in two grades - Liquid Flashing SW (summer-grade white) and Liquid Flashing WW (winter-grade white), depending on the ambient and surface temperature during installation
- Works on metals, masonry, wood, plastics, concrete and glass, along with all Sika membranes
- Eligible for Sika's System Warranty up to 20 years
