CARESIL® SIMPLIFIES THE PATH FORWARD AT IN-COSMETICS 2016

Multi-step Skincare Routines, One Clearly Transformative Ingredient

Carpinteria, California (April 5, 2016) — NuSil Technology LLC (nusil.com) is joining the world's leading cosmetics manufacturers at In-Cosmetics 2016, the premier global event for personal care ingredients, from April 12 – 14 in Paris, to help define the future of skin care – and get to that future faster.

Using a single revolutionary ingredient, CareSil CES, companies can rapidly develop an entirely new line of skin care products – cool, light-as-water serums, gels and creams – that are perfectly on trend with emerging multi-step beauty routines.

Striking an ideal balance between water and silicone, CareSil CES is the world's first and only fully encapsulated silicone emulsion made without surfactants. As a result, it creates transformative textures, refreshing and comforting with no tacky or oily after-effect. It also represents a huge breakthrough for R&D and manufacturing. CES can be post-added simply into existing formulations, transforming them into new, high-end, luxury products in a fraction of the typical development time.

"It's a challenge for manufacturers," says Michel Bassens, NuSil's Marketing & Sales Director, Skin Care. "Consumers are looking for lighter, fresher products and soothing skin care routines that are truly transformative. With CareSil CES, we help companies not only address these trends, but create new ones. And most importantly, they can do that quicker and more easily. The interest in CES from the world's leading cosmetic companies has been incredible and we look forward to expanding our relationships at upcoming events like In-Cosmetics."

You can experience CareSil's Asian inspired beauty routine as well as several live formulation demonstrations that show how easy it is to work with CES at In-Cosmetics, Stand E149 and on our website at nusil.com/ces.

The CareSil brand will also be featured at the New York Society of Cosmetic Chemists (NYSCC) Suppliers Day on May 10th - 11th in Edison, NJ (nyscc.org/suppliers-day), and at In-Cosmetics Korea on July 6th - 7th in Seoul, South Korea (in-cosmetickorea.com).

CARESIL® SIMPLIFIES THE PATH FORWARD AT IN-COSMETICS 2016

About CareSil

Born of innovation at a molecular level, the CareSil brand represents the most advanced and pristine silicones in skin care. Starting with CareSil CES, the world's first and only fully encapsulated silicone for surfactant-free formulations, CareSil enables manufacturers to speed the development of revolutionary products that fulfill their customer's most ambitious dreams for beautiful, healthy, younger-looking skin. With transformative textures and high-end luxury at little added cost, CareSil is how the future of skin care feels.

About NuSil Technology LLC

NuSil Technology, the global leader in medical and space-grade silicones, draws on over three decades of manufacturing expertise and innovation to develop products used in the most extreme environments – from deep inside the human body to the harsh conditions of outer space. The result of a deep commitment to engaging with our customers as partners, our best-in-class product lines are the choice for innovators in drug delivery, medical implants, general healthcare, skin care and advanced engineering. NuSil operates state-of-the-art laboratories and manufacturing facilities in North America and provides on-site, in-person application engineering support worldwide.
