Ogment helps teachers create more "Aha Moments"

What's Ogment?

A one-of-a-kind tool that helps teachers Create, Align, Share and Deliver Lessons - Assessments - or even Courses—in a fraction of the time.

- Saves teachers time by having one repository for all their resources and the lessons they create, modify or share.
- Engages students with multimedia resources including articles, videos, images, and games that teachers can quickly add to make lessons relevant and fun.
- Gives teachers and administrators insight into curriculum map alignment and standards coverage.

3 Steps to More "Aha Moments"

1. **Use the "Ogment Clipper" to…**
   - Curate and clip engaging ad-free web content
   - Automatically show textual evidence source and readability levels
   - Tag your resources for tracking and later searches by standard, topic, and more

2. **Quickly Create New Lessons or Modify an Existing One**
   - Drag and drop resources into your customized lesson template
   - Align lessons to standards
   - Import your district's curriculum maps and quickly align your lessons

3. **Collaborate, Share, and Deliver Lessons**
   - Differentiate Instruction – within the lesson
   - Create "tech-enhanced" assessment items - for PAARC, Smarter Balanced, and other state assessments
   - Share and collaborate with colleagues

And, The Real Difference – Ogment was co-developed with Educators
Ogment was co-developed alongside teachers and administrators from several school districts around the U.S. They used Ogment for over a year, meeting with us monthly to report on what worked and ideas for enhancing it to best fit their district and classroom needs.

Technically speaking, Ogment is…

- Cloud-based
- Built with HTML 5 and uses Responsive Web Design
- Integrates with your district's portal, SIS, Courseware and/or LMS
